

Microsoft Intune PoC

Value proposition

This offering is designed for customers taking either their first steps in exploring the use cases for, and benefits of, Microsoft Intune all-up (formerly Microsoft Endpoint Manager), or for customers that have already started their endpoint management modernization journey to the "North Star" of enabling a cloud-powered and scalable solution for hybrid work. The Good-Better-Best approach to operationalization enables organizations to rapidly consume the entire journey, or to incrementally consume over time to meet budgetary and organizational change management needs.

Workloads

- Microsoft 365 E3 / E5
- Windows / Windows 365
- Microsoft Intune (formerly Microsoft Endpoint Manager)

Engagement Outcomes

- Discover endpoint management goals and objectives to support a roadmap
- Customer endpoint management use cases evaluated in a live environment
- Accelerate your endpoint management journey
- Defined next steps based on your needs and objectives

Engagement Offer*

- **Microsoft funding for Invoke-led Journey may be available upon request*
