TEAMS APPS & SOLUTIONS JUMPSTART IMPLEMENTATION

INVOKE

Invoke-led Microsoft funding may be available upon request

Value Proposition

By customizing & extending Teams with Teams Apps & Solutions, customers will be able to experience a tailored Teams hub that features custom-built collaborative apps, process automation tools, and integration of current third-party and line-of-business apps. Leverage the rich set of Teams platform capabilities and help your business rethink productivity, drive business outcomes, and maximize the value of Microsoft Teams.
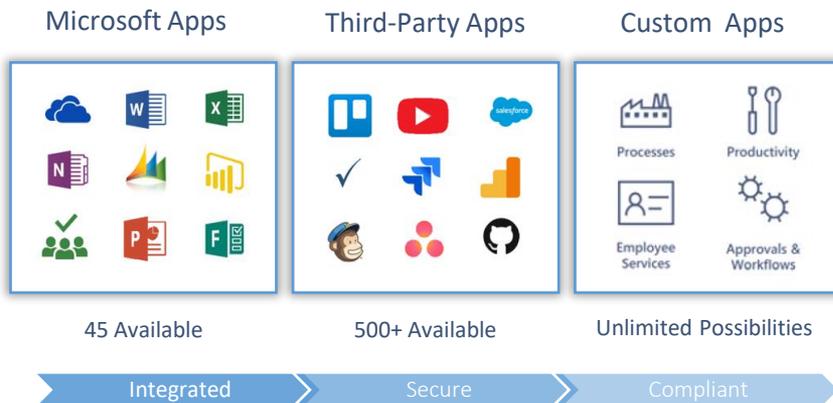

Customer Benefits

- Launch ready-to-use apps within your environment
- Empower end users to create their own apps
- Amplify your solutions using custom Teams integrations
- Manage the lifecycle of an app in Teams
- Enable processes for vetting app security & compliance

Invoke Scope of Delivery

- Assess the readiness of your platform and app estate
- Envision what is possible and plan for apps in Teams
- Develop and implement app governance & controls
- Enable a proof-of-concept Teams app(s) in tenant
- Implement tools to automate app management & reporting
- Provide business end-user interactive training sessions
