# Propel Your Firm's Technology with a Strategic IT Roadmap

## About Cornerstone.IT Technology Assessment and Roadmap Designed for Law Firms:

Since 2003, Cornerstone.IT delivers Professional IT and Managed Services to small & mid-sized law firms. We strategize, plan, design, implement, & maintain network systems that optimize IT investments & produce high-efficiency results.

### What we offer

We understand that small and mid-sized law firms have the same technology problems as enterprise firms but don't have the same resources. This is why strategic planning is imperative for small and mid-sized law firms. When smaller IT departments' days are spent dealing with mundane and time-consuming issues, strategic planning is often put on the back burner. With over 20 years of providing strategic planning, professional IT, and managed services to law firms, Cornerstone.IT can fast-track your IT planning with an in-depth analysis of what you have so that together, we can prioritize what your firm needs, and create a two-year technology roadmap that will move your firm forward within budget.

### What our customers are saying

“Cornerstone has deep roots in the legal industry and knowledgeable engineers with expertise not found in local consultants. They adapt to our needs, abilities, and working style.”

— Karen Norman, IT Director,  
Downs Rachlin Martin PLLC

# Why Microsoft Azure?

## Be future-ready

Continuous innovation from Microsoft supports your development today, and your product visions for tomorrow. With 1,000+ new capabilities in the past year, you can build on the latest advancements in AI, blockchain, Kubernetes, containers, and databases to keep you ahead of the curve.

Our enterprise grade analytics solution outperforms the competition, costs less, and is fully compatible with your existing development, BI, and data-science tools

## Operate hybrid seamlessly

On-premises, in the cloud, and at the edge—we'll meet you where you are. Integrate and manage your environments with tools and services designed for hybrid cloud.

Enhance security, simplify access, and set smart policies across your different environments with a single-identity platform trusted by 90% of enterprises globally.

## Build on your terms

You have choices. With a commitment to open source and support for all languages and frameworks, build and deploy how you want to. Take advantage of the full-featured, integrated development environments with built-in support Visual Studio and Visual Studio Code, the most popular IDEs trusted by 15M+ developers.

We embrace open source, drive innovation through collaboration, and contribute back to the community.

## Trust your cloud

Get security from the ground up, backed by a team of experts, and proactive compliance trusted by enterprises, governments, and startups.

With a \$1B+ investment in security R&D and 3,500 cybersecurity experts, security is foundational for Azure.

## Microsoft Azure

Microsoft Azure is an ever-expanding set of cloud computing services to help your organization meet its business challenges. With Azure, your business or organization has the freedom to build, manage, and deploy applications on a massive, global network using your preferred tools and frameworks.
