

Enhance and Enforce Security with Azure Conditional Access

8-Week Implementation

For IT leaders of small or mid-sized law firms

Security Focused

Cornerstone.IT is **NIST 800 171 compliant**.
We have built NIST compliance into the way
we work.

Expert Engineers

Our **Microsoft** engineers hold an extensive portfolio of **certifications**, including, *Microsoft Certified: Azure Security Engineer Associate, Microsoft 365 Certified: Modern Desktop Administrator Associate and Microsoft Certified: Azure Solutions Architect Expert.*

Are you confident that your Azure environment is secure? We have a solution.

Let Cornerstone.IT help start your move to Zero Trust Network Architecture with Microsoft **Azure Conditional Access**.

Are you challenged providing users with?

- Selective remote access to applications and data
- Secure access with the ability to revoke on-demand
- Secure remote access with multi-factor authentication (MFA)
- Secure and support various endpoint devices

IDEAL SOLUTION

Cornerstone Implementation of Microsoft Azure Conditional Access

- Implement fine-grained access & authentication policies
- Simplify identity management
- Streamline user logins

DESIRED OUTCOME

Zero Trust Security

- Selectively provisioned and secure remote access to applications and data, from anywhere.
- Facilitate multi-factor authentication and enhance user login experience

With a Cornerstone **implementation** of Microsoft Azure Conditional Access, your firm will be able to easily:

Secure remote access to apps and data, from anywhere

Transform Your Remote Access and Network Architecture with **Zero Trust**

Calculate risk detection in real-time

Block risky sign-ins

Require compliant devices

Block untrusted devices

Require approved client applications

Block legacy authentication

Enforce sign-in frequency

Control browser persistence

Cornerstone Helps

We have the **expertise** to set up, configure, and customize Azure Conditional Access for your applications and data.

Secure and customized solutions that keep your firm working.

Unlike other solution providers, we **take the time** to:

- Understand your current workflow and how your end-users like to work.
- Understand your firm's security needs & compliance requirements

We hold an impressive portfolio of **Microsoft certifications** — we are experts.

Cornerstone.IT is **compliant** with and maintains a strict adherence to the **NIST 800 171** standards.

A Cornerstone Implementation of Azure Conditional Access Gets You on the Path Towards Zero Trust Security.

As a Microsoft Gold partner Cornerstone.IT implements cloud, on-premises, and hybrid Azure solutions with customized designs so your remote workers can stay productive and work more confidently from anywhere.

Cornerstone.IT is **NIST 800-171 compliant.**

What Our Clients Say:

“Cornerstone has deep roots in the legal industry and knowledgeable engineers with expertise not found in local consultants. They adapt to our needs, abilities, and working style.”

— Karen Norman, IT Director, Downs Rachlin Martin PLLC
