

# Secure Your Applications & Data with Azure Conditional Access

**Tired of troubleshooting and supporting VPN and remote user access?**

**Are you confident that your Azure environment is secure? We have a solution.**

Go beyond the network perimeter concept of traditional security by migrating your organization to the identity-based model of "zero trust" by securing your applications, data, and desktops with Azure Conditional Access. Get selective with your remote users' access to data and applications. Enhance and enforce security with real-time and ongoing authentication and on-demand provisioning of access and permissions.

**With a Cornerstone.IT implementation of Microsoft Azure you can:**

Implement and enforce real-time access & authentication policies

Integrate with your MFA (multi-factor authentication) solution

Simplify identity management

Streamline user logins with single sign-on (SSO)

Secure remote access to your applications, files, and desktops, whether on-premises or in the cloud

**Stop hackers from accessing your data by configuring near real-time protection with Continuous Access Evaluation**

**CORNERSTONE.IT**

NIST 800 171 Compliant

# Best Practices for Azure Conditional Access Deployment

Gold  
Microsoft  
Partner

Our highly trained and certified engineers implement cloud and hybrid Microsoft Azure solutions with customized designs so your remote workers can stay productive and work more confidently from anywhere.

Review current configuration of remote access to your applications, files, and desktops (on-prem or in the cloud)

Design Microsoft Azure Conditional Access configuration including identity management

Secure remote access to applications, files, and desktops — physical and virtual

Configure single sign-on (SSO) with multi-factor authentication (MFA)

Configure fine-grained security policies aligned with your firm's compliance requirements

Enable and configure near real-time protection, geofencing, and proximity routing

Lay the Foundation of Your Technology With the Hands of Experience.
