What is MagiXBill?

MagiXBill is an efficient and reliable Call Accounting software package for monitoring and reporting telephony activity. MagiXBill can be deployed in virtually any enterprise of any size or activity. Telephone costs are easily allocated to various departments, cost centers or individuals. MagiXBill monitors telephony costs and traffic, and notification alerts are sent instantly in case of any misuse or fraud.

MagiXBill monitors incoming and outgoing calls in real time. Trunks utilization is also monitored for full telephony resources optimization. The extensive reporting provides calls analysis instantly for full telephony costs monitoring and optimization.

MagiXBill supports all the well known Telephony systems.

Boost employee productivity

Call accounting is a great tool to help show your employees how they can better communicate and improve their work practices. When you know many calls are coming in, when they are being made and how long the calls are averaging, you now have hard data to help manage communication tactics.

Useful metrics can help identify security threats

Monitoring and analyzing data on your phone system supports in tracking and reporting on expenses. Call accounting can show and alerts of any activity that deviates from normal usage. This tool helps with corporate accounting practices and automates the monitoring of sales and financial performance.

Why customers use MagiXBill

- Gives total control over the telephony bill
- Automatic alerts based on user defined rules
- Online graphical dashboard
- Can be deployed for any business size and activity
- Complete monitoring of telephony costs
- Unlimited customizable reports
- User friendly interface
- Integration into hospitality PMS

Lowers operational costs

When you collect CDR data, you have information about numbers dialed, incoming call origins, extensions used for calls and length of calls. You can search and analyze phone usage data to allocate costs back to certain departments or individual employees, making budgeting of phone system expenses much more targeted and accurate. In the long run, it will reduce your telecom costs overall.

MagiXBill deployed on MS Azure, redefines business telephone management and gives a new meaning to 'state-of-the-art'
