

Simply Powerful
eDiscovery for Corporations

“We significantly reduced the number of documents sent to the costly and time-intensive stage of attorney review, allowing us to maintain full control while meeting a strict deadline and saving thousands in costs.”

— Ipro Customer, New York City

Get to the Heart of the Matter

Welcome to Ipro, your eDiscovery litigation life cycle solution.

Big Data is real, and it continues to grow exponentially, particularly in the corporate world. In fact, according to a 2018 White Paper by the International Data Center, *"Beginning in 2019, more data will be stored in the enterprise core than in all the world's existing endpoints."* Along with this growth in data, the enterprise's role as a data steward grows as well.

For corporations, compliance, investigations, and litigation are simply a part of business-as-usual. But being able to get to the facts at hand can be complicated with an ever-changing data landscape, not only due to increasing data size but from the infinite number of file types and file variations involved.

By partnering with Ipro, corporations can more effectively manage their enterprise data by utilizing powerful data processing and review software, along with advanced analytics and AI, all developed by a 30-year legal technology veteran who hosts some of the biggest corporations and law firms in its cloud.

With Ipro's hybrid approach combining software, services, and support in a flexibly deployed and infinitely scalable solution, corporate investigative and legal teams can quickly and accurately cull and search large, complex datasets to quickly get to the most relevant documents.

Software, services, and support bring everything together.

Ipro helps you reach a speedy resolution by getting relevant documents into ECA or Review

For a speedy resolution to litigation: Begin with Ipro's Best-in-Class Processing tool which can quickly ingest, analyze, and prepare thousands of filetypes, then stream them directly into Review. Ipro is a completely scalable solution that enables you to handle projects of any size without sacrificing quality, efficiency, or user experience.

Enjoy the automated and integrated workflow: Streamline your process and reduce the traditional starts and stops of eDiscovery, giving corporations a simpler, more affordable way to process, track, review, and produce relevant documents.

Avoid time delays, errors, and budget overruns: Ipro includes Early Case Assessment (ECA), Technology Assisted Review (TAR), and Advanced Analytics Visualizations, providing you with intelligent access to the facts of the case.

Quickly access and manage related documents and keywords: Assign, view, tag, notate, and redact with Ipro's integrated document reviewer.

Meet tight case deadlines: When you choose Ipro as the solution for your eDiscovery needs, you also gain the benefits of a true technology partner with managed services.

Ipro for enterprise

Major performance and productivity gains, including:

- Unlimited extraction of meta-data fields
- Increases in overall processing speed, up to 40%
- Report generation speed performance gains of up to 95% on SSDs
- Up to 70% efficiencies in CPU usage
- Improved processing of new and complex file types
- Superior image and production quality, including the latest MS Office file types

Deployed the way you want it
Cloud | On-Prem | Desktop

With Ipro, surge between deployments and work as flexibly as you need!

The Benefits of Using the Ipro Cloud

Who better to support your cloud environment than the people who built the software.

Benefits of the Ipro cloud

- State-of-the art ISO 27001 & SOC II & III Data Center
- Top tier hardware, SQL and virtualization
- On demand spin up of additional resources
- Ipro software updates and patches performed on your behalf
- SQL Database and administration focusing on best practices and performance for your Ipro solution
- Multiple levels of Disaster Recovery Options available
- FTP/SFTP/Self Service and Data Handling Machines with Virus Scanning
- Quicker support access and resolution when in the Ipro Cloud

Features of Ipro for enterprise - *deployed in the Ipro cloud*

- Automated quality controls to minimize human errors
- Easy-to-Use intuitive interface
- Self-service data uploads
- Scalability allows you to customize Ipro to meet your licensing demands
- Gold-standard in Imaging, OCR & Production using automated Ipro worker engines
- Eyes on documents in minutes to eliminate inefficient workflows

Supported by Managed Services

Ipro's litigation support Case Managers assist your team by recommending economical solutions for your eDiscovery processing needs while also helping you to develop a well-organized document review strategy that leverages our first-class Ipro Analytics, such as TAR, email-threading, near-duplicate detection, and concept clusters.

We can provide:

ESI Processing: With the Ipro platform, our case managers can efficiently process thousands of electronic file types, including forensic image files. No project is too large – our solution is entirely scalable with automation built right into the software to provide an exceptional user experience.

Early Case Assessment: Ipro's Timeline, Visual Search, Clustering, and Keyword Management features help you select your data to conduct a more focused review. Our experienced case managers are available to review workflows and keyword search syntax, and to help you prioritize your Concept Clusters.

Review: Our team can assist you in customizing your review case, workflows, tag palettes, coding forms, searches, and linear review. Users can submit new user requests, run searches, submit production requests, and training on new review features is continually available.

Technology-Assisted Review: We include Ipro Analytics – email threading, near-duplicate detection, concept clusters, categorization and Technology Assisted Review (TAR) in all cases we host. Our team can help you identify responsive and non-responsive documents, prioritize your review, and speed up review time.

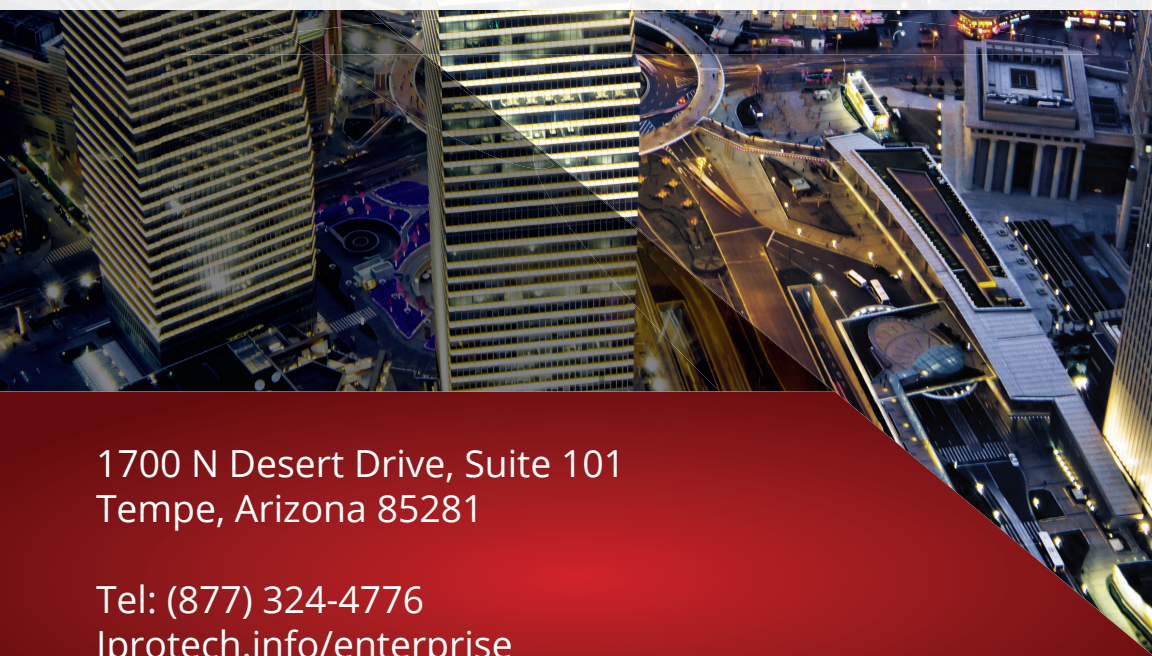

Production: Ipro's case managers will ensure that you stay in front of production deadlines by proactively building production templates in advance, imaging relevant documents as they become available, and conducting a comprehensive QC throughout the entire process.

Case Management: Once the workflow is established, Ipro's Services Client Portal allows requests to be submitted directly to the Ipro team any time.
