

HealthCare Locator SDK

Sourcing and integrating healthcare provider (HCP) data for use in mobile and desktop health apps can be costly and complex. The HealthCare Locator SDK allows developers to quickly (within hours) and easily connect their applications to HCPs profiles (including locations, names, specialties, etc.).

Key features and benefits

Available for iOS, Android, and JavaScript

Purpose-built for easy integration in as little as a few hours (vs. months)

Pre-built search & map display screens

Customizable layout options

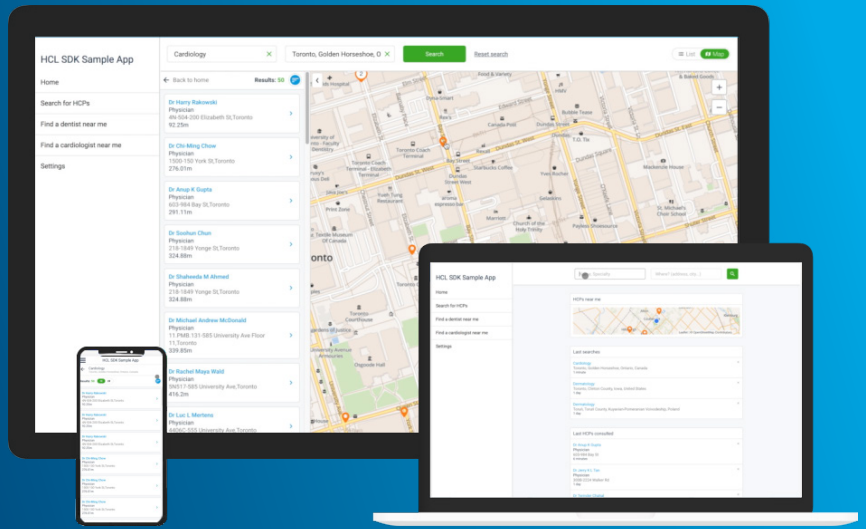

Scalable utility pricing model with a free trial version available

24/7 access to technical support

Pre-integrated with the world's largest and most accurate provider database, including:

- 23M healthcare professionals
- 3M healthcare organizations
- Over 200 specialties
- Daily updates

IQVIA Healthcare Locator SDK

WHAT IS THE HEALTHCARE LOCATOR SDK?

Healthcare Locator SDK is an open-source Software Development Kit. It is a module that you can easily integrate into your web site or mobile application to get access to OneKey Healthcare database (23 million Healthcare Professionals, 3 million Healthcare Organizations in 110 countries, updated daily).

WHAT ARE THE HEALTHCARE LOCATOR SDK FEATURES?

Healthcare Locator SDK provides components and customizable screens and a facilitated use of IQVIA's and third parties' APIs. It allows its users to Find and Locate HCPs and HCOs, search them by name, specialty, location and by medical term/expertise, to Recommend / Share other HCP profile, Request HCP's information update. In the next releases, it will also allow users to participate to surveys and clinical trials, receive information, take appointment with HCP, start Teleconsultation and access partners' applications.

Find HCPs/HCOs by location, name, specialties and medical terms (new)...

Find HCP/HCO near me

Access to HCP/HCO detailed profile

WHAT ARE THE BENEFITS?

- Provides Easy Access to complete, consistent, tailored and updated HCPs/HCOs' database
- Avoids significant development, data integration and maintenance costs.
- Creates a real ecosystem around Patients to avoid switching them to other apps or resources.
- Generates revenues through surveys and clinical trials.

HOW DO I GET IT?

You can access to Healthcare Locator SDK directly from [GitHub](#) and access to Documentation and licenses Keys from our [website](#).

HOW MUCH DOES IT COST?

Access to HealthCare Locator Data Connector and Yearly Maintenance: \$ 3,000

HealthCare Locator Usage Fees: Payable per package - from \$ 0.25 to \$ 0.15 per request.

Optional Services : Premium Support (Yearly subscription) : \$25,000
