EFFICIENT INTELLIGENCE

Advantage IRIS

Affordable

Per seat to enterprise level pricing.

Easy Implementation

Set-up in hours not days.

Military Grade Encryption

Secure transmission and storage.

Flexible

Create multiple requests types.

About Us:

IRIS is purpose built to streamline the intelligence request, communication, and dissemination processes.

ABOUT IRIS

The Intelligence Request & Information System, known as IRIS, is a comprehensive platform designed to streamline the intelligence request, communication, and dissemination processes for law enforcement agencies. IRIS offers unique features such as request management, simple account and visibility management, output consistency and control, and support for common file formats to be uploaded and presented. IRIS is a cloud-based, SaaS solution accessible by any device with a web browser and requires no expensive specialized equipment or personnel to maintain and operate. IRIS is designed to be an affordable tool to help maximize the effectiveness of real-time crime centers and analysts, improve efficiency, and ensure compliance with government regulations.

FEATURES

Cloud-based:

IRIS is a modern web app hosted in Microsoft Azure GOV Cloud, which means there are no installs, hardware or hidden costs.

Scalable:

Hosted in Microsoft Azure GOV Cloud, IRIS is easily scalable to accommodate organizations and agencies of any size.

Chat function:

IRIS provides a chat function that enables users to track conversations related to a specific topic request, while preventing conversations from "bleeding" into other platforms such as email, texts, or instant messages.

Request tracking:

IRIS allows users to track, manage, and report on assignments, priorities and workloads to ensure that no work items are lost.

Full text search:

IRIS provides a full text search feature that enables users to easily reuse data that has already been gathered, reducing data redundancy.

Compliance:

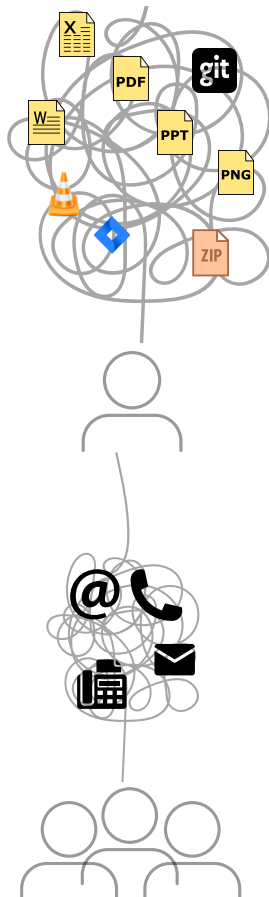

IRIS comports with the CJIS Security Policy and is designed to be government ready and suitable for use in any law enforcement agency.
