

VIDEO CONFERENCING WITH IRISTICK SMART GLASSES

Hands-free remote sessions anytime, anywhere

Video conferencing has become a vital element of business life. However, there are situations where traditional video conferencing tools come short. Employees need to use their hands while getting remote assistance.

Iristick offers video conferencing solutions to organizations for enhancing virtual collaboration and support.

MICROSOFT TEAMS ON IRISTICK

Microsoft Teams is a widely used cloud-based team collaboration software. Using it on your Iristick smart glasses enables hands-free calling, video meetings and file sharing which improves the collaboration with your remote workforce and the overall efficiency of your operations.

Microsoft Teams on Iristick solution makes **hands-free** information exchange possible with **utmost freedom and comfort**. While enjoying the features of Microsoft Teams, you will also feel the comfort and advantages of wearing lightweight Iristick smart glasses.

Both compatible with Iristick.G2 PRO and Iristick.H1 smart glasses.

IRISTICK.G2 PRO

IRISTICK.H1

USER OPTIONS

Microsoft Teams on Iristick allows your organization to use your Iristick smart glasses as a communication tool using Microsoft Teams, working on an existing Microsoft Teams environment.

To get you started we combined our glasses with a Microsoft Teams on Iristick License. This out-of-the-box solution allows you to use our glasses immediately with your Microsoft Teams account.

For this option, visit Iristick web shop.

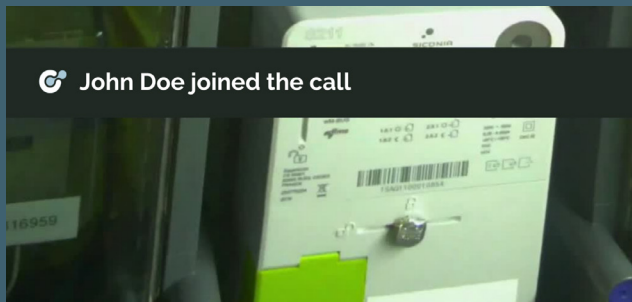

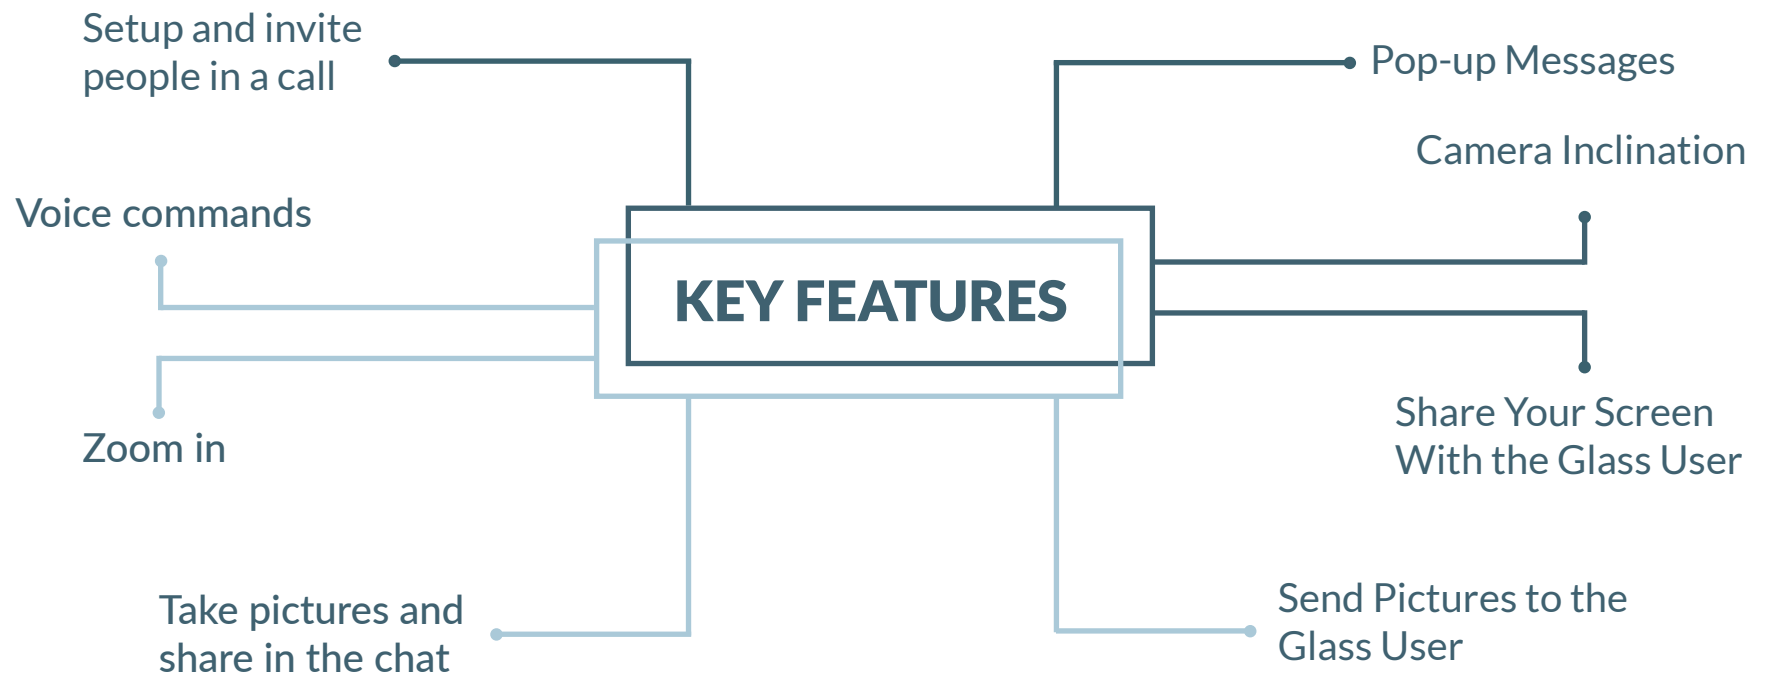

Next to the out-of-the-box solution, we also have a self-hosted solution. This allows you to be in full control of your Microsoft environment and your meeting data, without any third-party intervention.

For more information, please contact us.
