Virtualization and Cloud Computing

Virtualization is a creation of virtual version of Servers, Networks and Storage Devices. Our experts virtualize your environment which help to reduce Capex & Opex, save energy go-green, reduce data center footprint, faster server provisioning, reduce hardware cost, increase uptime, improve disaster recovery and business continuity.

Cloud Computing not only improves business processes & operational efficiency. It reinvents the role of IT. And when aligned with organizational strategy, it can give you a competitive edge. IBS helps simplify your path to the cloud. Backed by a decade of experience building cloud environments, we match your business needs with the right secure, enterprise-class solution.

Ironbridge Systems Pvt. Ltd

Server
and
Storage
Infrastructure

Server Infrastructure is a secret weapon for businesses. As the technology that runs your e-mails, scans for viruses to protect network and allow your employees to work together and access key data from remote locations.

Our experts design Server Infrastructure by focusing business needs and processes.

Storage Area Network (SAN) is a high-speed special-purpose network that interconnects different kinds of data storage devices with associated data servers on behalf of a larger network of users. Our engineers implement SAN solutions to ensure the high availability of data, backup and recovery.

Disaster Recovery
and
Unified Communication

Disaster Recovery (DR) strategy is crucial to protect your organization's future in the event of a natural or other emergency that causes the downtime. We have compiled our best resources to ensure that your Disaster Recovery (DR) plan is complete, up to date and appropriate for your organizational need.

Unified Communication is an evolving set of technologies that automates and unifies human and device communications in a common context and experience. It optimizes business processes and enhances human communications by reducing latency, managing flows, and eliminating device and media dependencies.

Network
and
Security Solutions

Network Security consist of the provisions and policies adopted by a network team to prevent and monitor unauthorized access, misuse, modification, or denial of a computer network and network-accessible resources. We ensure your Network Security to protect your business from internal and external threats.

Routing and Switching have become the foundation for all business communications – not just data, but also security, voice, video and wireless access. Our internetworking experts design state of the art solutions by focusing on your unique organizational needs and business process.
