Microsoft

Industry situation: Outdated monitoring solutions affecting both performance and innovation

Get rid of the outdated software and implement a solution that enable you to focus on the core business.
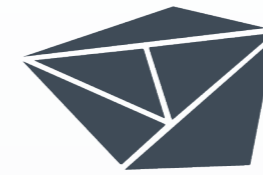

CHALLENGES

- Outdated software
- No scalability and flexibility
- Long term contracts
- Time consuming
- Lack of control

IDEAL SOLUTION

- Flexible solution, always up to date
- Scalable and built-in security
- Continiously updated and improved
- Pay for what you use

DESIRED OUTCOMES

- Proactivity
- Scale and control
- Automated solution
- Trusted platform

IRONSTONE

Cloud Insights

By combining important features with automation, you get a solution that keeps you proactive while focusing on the core business.

1

Microsoft Azure

Identity & access, high reliability and security.

2

Azure Lighthouse

All the management tools you need to work better.

3

Cloud Experts

Alarms that you don't know how to manage or need further support?

Ironstone Cloud Insights & Microsoft Azure

We have designed a solution that makes it easy to implement, manage and utilize the product to its full extent based on best practices. Furthermore, we can go through your setup and perform adjustments to the configuration based on your needs.

Azure

We believe that a well-documented environment is important.

Automation

We have spent countless hours developing the solution to make it fully automated.

Updated

We continuously add new features as well as develop the solution together.

All the power of Cloud to empower a new way of working
