IRONSTONE

The Solution

- A better way to manage your endpoints!

Provide your workforce with a complete out-of-the-box solution that enables efficient and flexible working while in full control of the security, devices, and corporate data.

IRONSTONE

All the power of Cloud to empower a new way of working

Utilize Microsoft 365 with a solution that lets end-users work flexibly anywhere, anytime, and on any device while maintaining security with intelligent access controls and easy management for IT. Continuously updated monthly through a lifecycle program.

IRONSTONE

User Management

Provide one identity through Azure AD to your users for a seamless and secure experience.

Device Management

Let employees work on any device with self-service device registration and access controls.

Application Management

Run all your apps securely in a browser with technology that removes access complexity.

Monitoring & Reporting

We provide valuable device compliance and operations alerts, and valuable insights.
