# I$LET EMISSION CALCULATION APP

WHAT

- Emission entering, calculation and reporting app is originally created to support GHG-protocol

- App is based on Power Apps and its fully customizable to Your brand

- Localized for Finnish, English and Swedish, but can be extended to any language

- Calculation solution enables users to enter emissions by different sources and manage emission factors

- Emission reporting is based on Power BI

- Makes emission collection easier, calculates emissions to tCO2e automatically and helps to follow-up and achieve Your sustainability targets

PACKAGING

Free app, pay only for customization	Deployment duration: 1-2 weeks
