ISLET

AZURE DATA PLATFORM KICKSTART

Description:

Introduction workshop for Azure Data Platform reference architectures, key components and use cases. Based on the information collected we will prepare presentation of proposed initial architecture and deployment plan. Plan can involve migration, in case customer organization is already using other cloud solutions or on-premise solutions (like SQL Server). We will also introduce Microsoft's Cloud Adaptation Framework for Data Management during the workshop.

Benefits:

As end result customer has clear understanding on relevant Azure Data Platform architectural options, capabilities, pros/cons to their unique environment and initial architecture and deployment plan.
