iSoftStone

From Architectural Complexity to AI-Driven Clarity
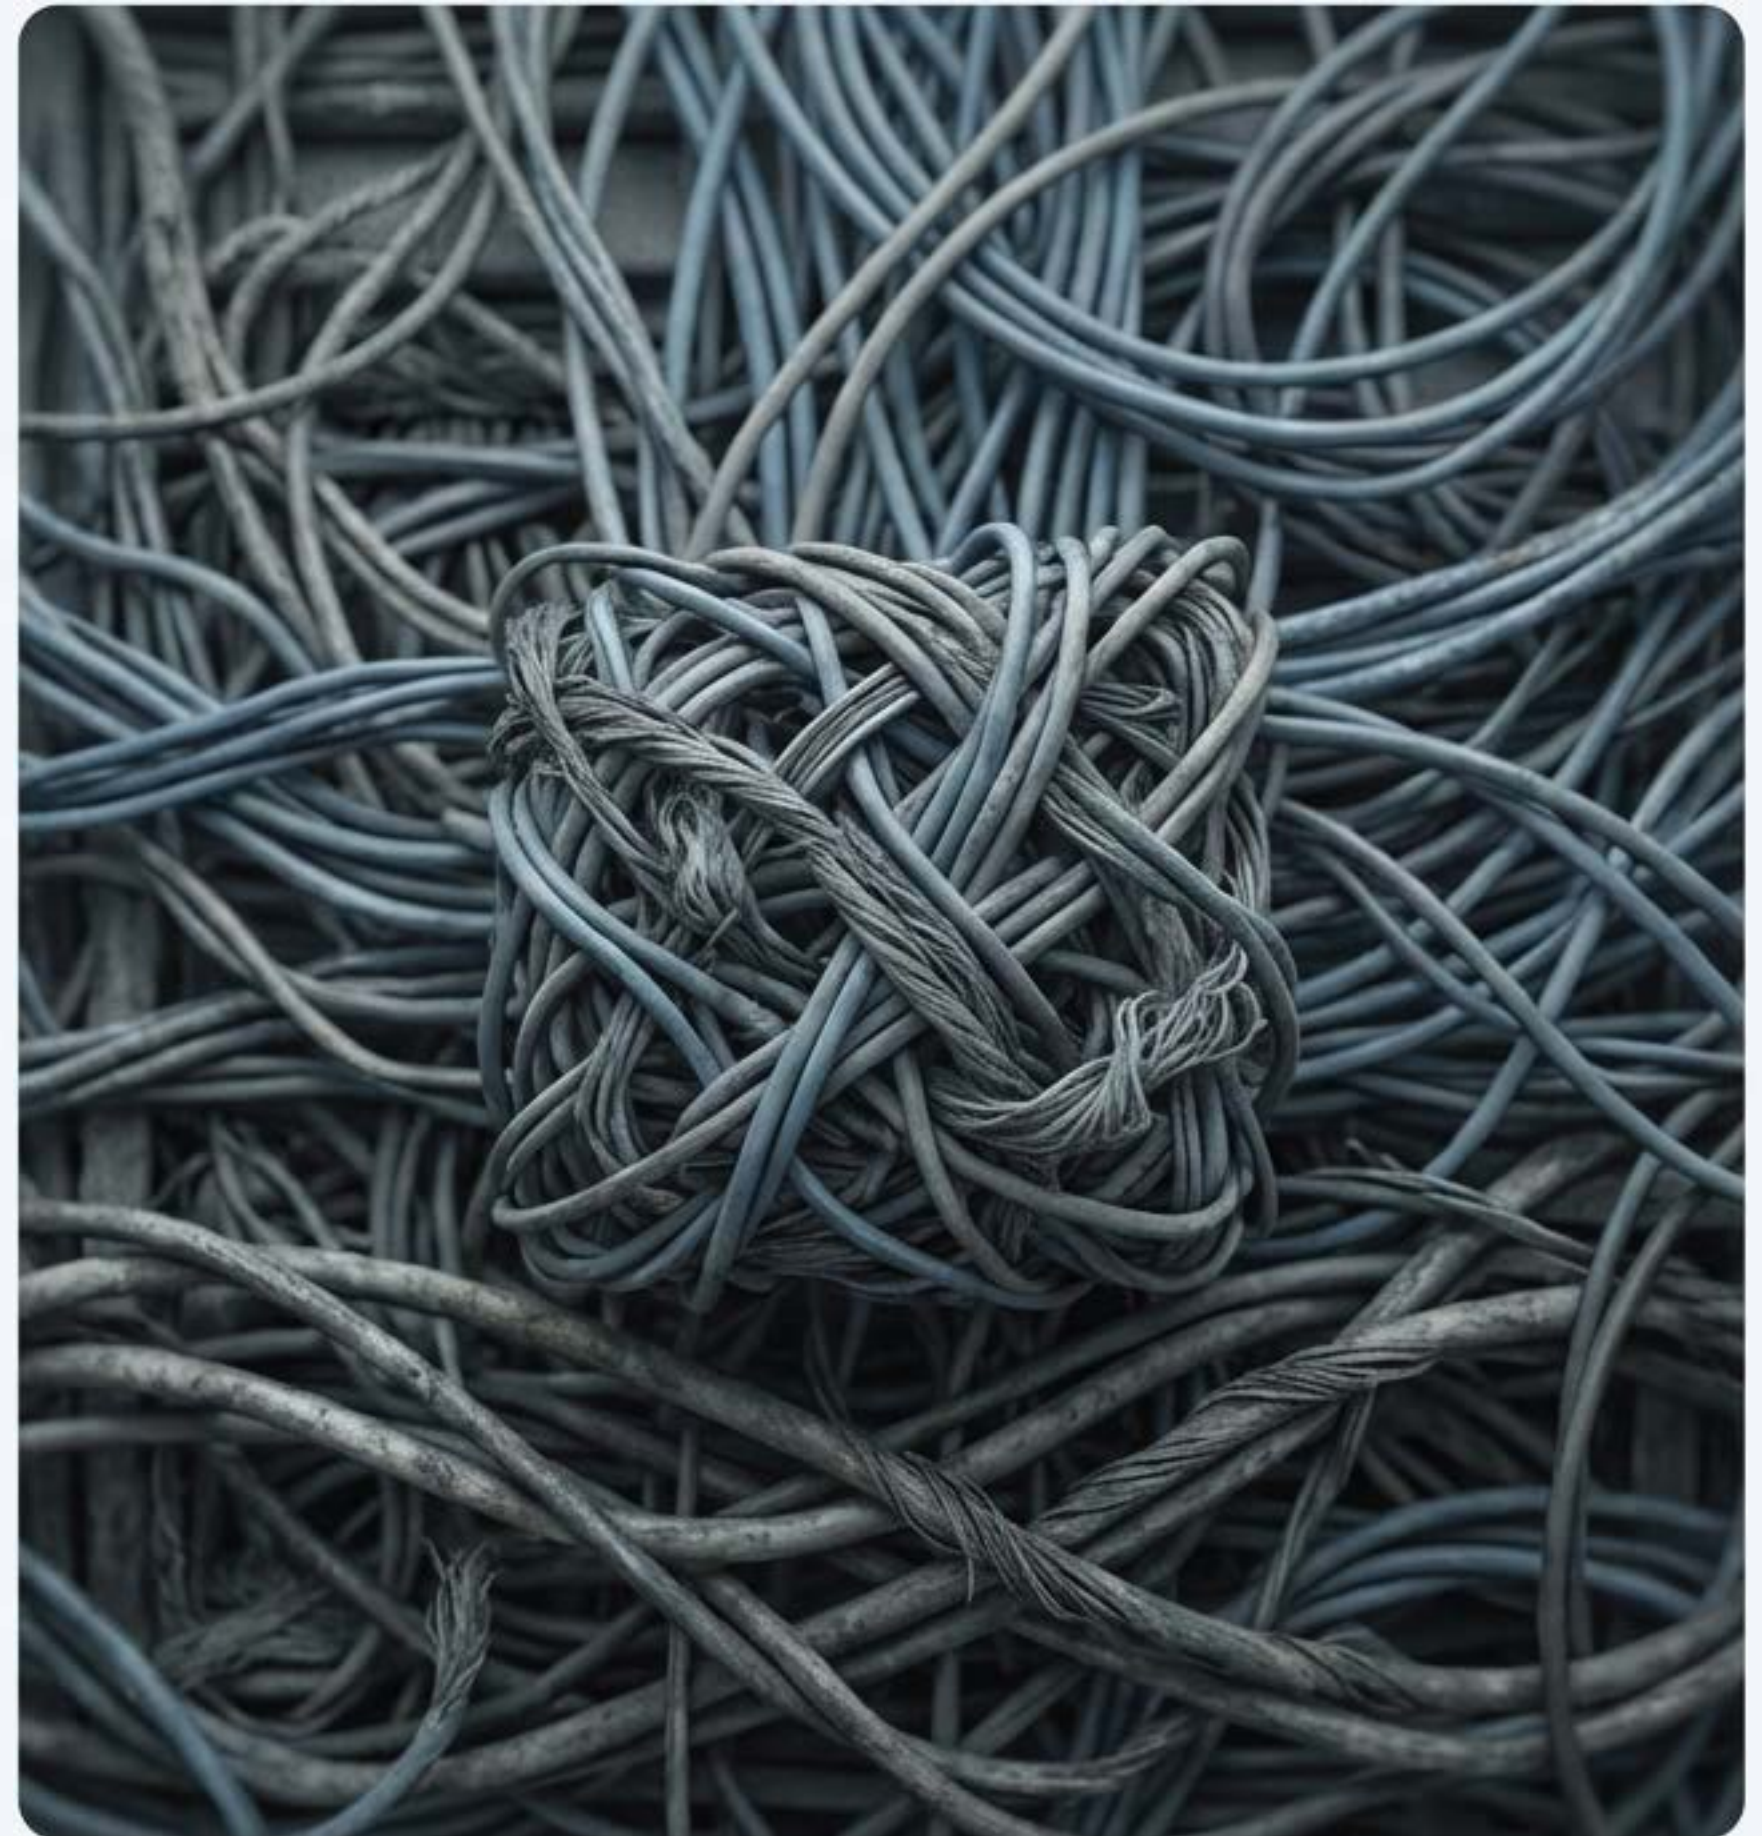

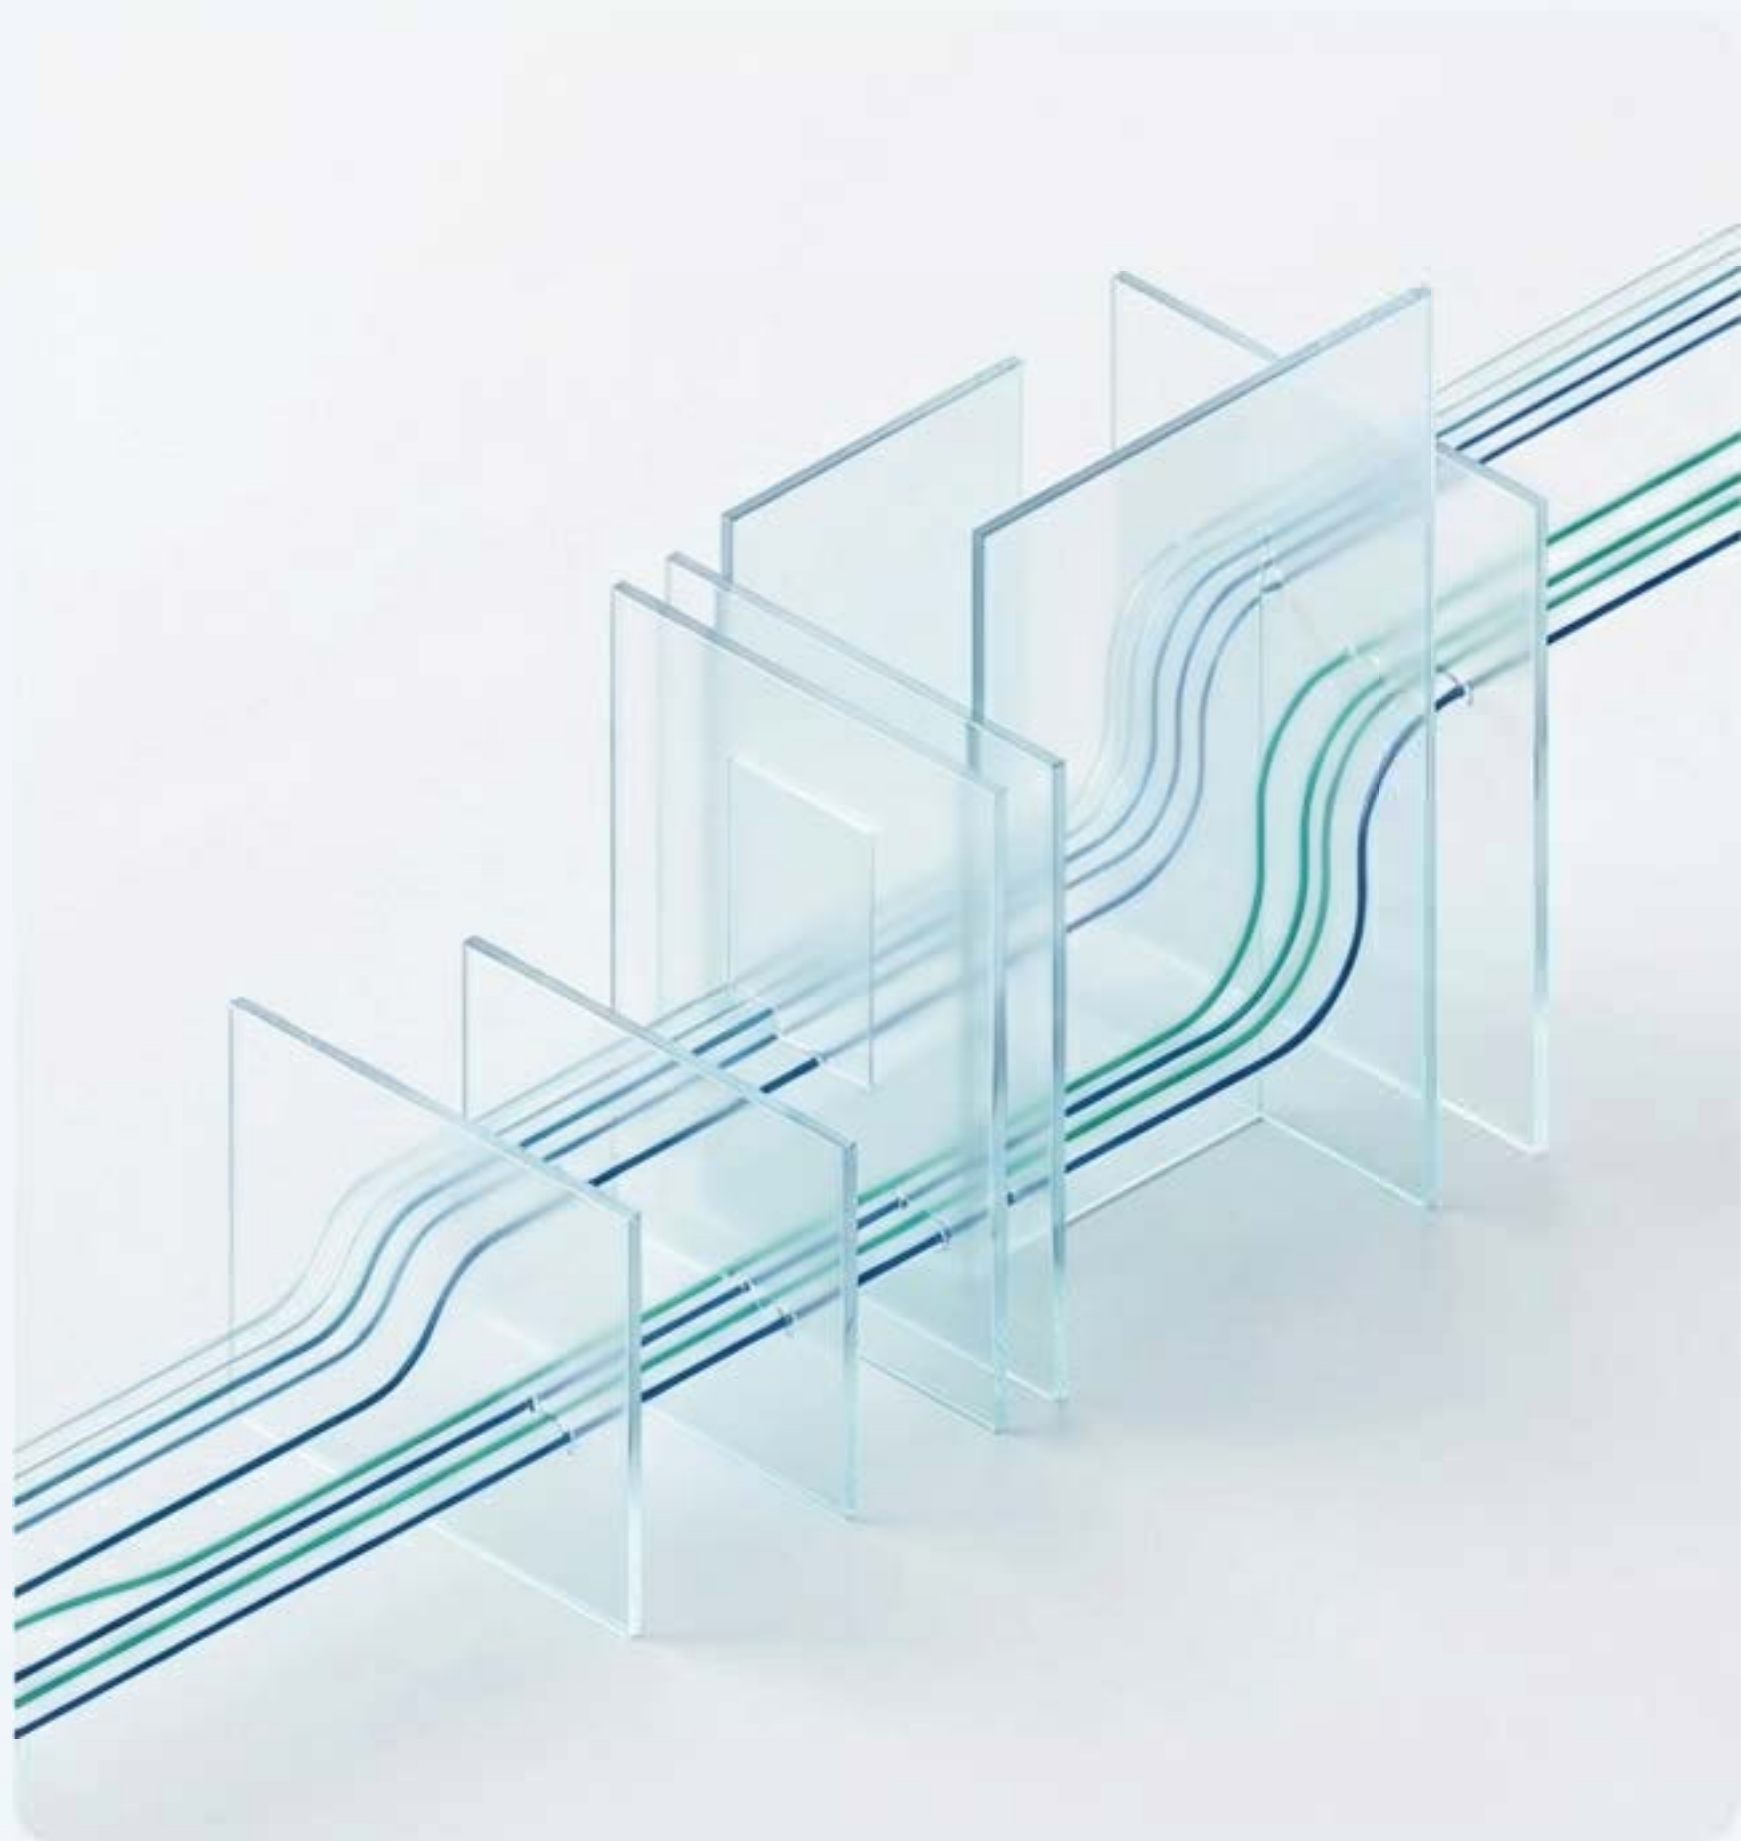

The iSoftStone AI & Cloud Architecture Advisory

Your organization's potential is locked behind architectural complexity and mounting technical debt.

Many enterprise and mid-market organizations face significant hurdles that prevent innovation and create risk:

- Legacy applications and platforms hinder efficiency and future-proof operations.

- Untapped AI and automation capabilities lead to missed opportunities for productivity and growth.

- Evolving security threats expose the business to unacceptable risk without a modern defense.

- Siloed data and outdated analytics prevent informed, strategic decision-making.

Imagine a future where your architecture is an engine for innovation, not a barrier.

A modernized, AI-ready foundation empowers your organization to be more agile, secure, and intelligent. This future state is defined by:

- **Efficiency:** Streamlined operations and reduced technical debt.

- **Innovation:** The ability to rapidly deploy AI, Copilot, and automation.

- **Security:** A robust posture that protects critical assets and ensures compliance.

- **Insight:** Data-driven decisions powered by clear analytics and business intelligence.

This transformation delivers a clear and measurable impact on your business priorities.

Receive a clear and actionable modernization roadmap tailored to your business priorities

Identify AI and Copilot use cases that deliver tangible business value

**Enhance your organization's security and compliance posture.**

Reduce technical debt and minimize delivery risk.

Accelerate your readiness for leveraging Microsoft AI and cloud services.

The iSoftStone AI & Cloud Architecture Advisory is the bridge to your modern future.

Our advisory is a comprehensive consulting engagement led by a team of AI and Cloud Integration Specialists. We are dedicated to assessing your current architecture, pinpointing areas for modernization, and developing a secure, AI-ready roadmap in alignment with best practices for Microsoft Azure and Microsoft 365.

Our expertise ensures your transformation is successful, secure, and built for the future.

Deep Microsoft-Focused Expertise

Our team possesses deep expertise in Microsoft-focused AI and cloud integration, ensuring solutions are optimized for your environment.

Proven Enterprise Delivery

With a proven track record of large-scale enterprise delivery, we bring reliable and robust project execution capabilities.

Strong Governance & Security

We emphasize strong governance, security, and compliance, helping your organization maintain regulatory standards and protect critical assets.

# We provide a structured 2-4 week engagement to deliver your actionable roadmap.

Assess   Analyze   Strategize

Week 1   Week 2   Week 3-4   Week 4

Offer Type: Consulting Services

Duration: Engagements typically span 2-4 weeks and can be configured to meet your specific requirements.

Delivery: Available remotely or onsite.

Target Audience: Designed for enterprise and mid-market organizations seeking to modernize their digital landscape.

Our advisory begins by assessing the foundational layers of your technology.

Architecture & Application Modernization

Comprehensive review of application, cloud, and data architectures. Actionable recommendations for modernizing .NET, Java, and legacy systems.

Security, Risk & Compliance

In-depth threat modeling and review of security architecture. Alignment of practices with Microsoft security frameworks for comprehensive protection.

Quality Engineering & Test Automation

Assessment of test automation strategies using Playwright and development of a QA modernization strategy for improved software quality.

We then identify opportunities to unlock new levels of productivity and intelligence.

AI & Copilot Enablement

Identification of use cases for Copilot Studio to enhance productivity and guidance in custom AI agent architecture.

Data Analytics & Business Intelligence

Review of analytics and BI dashboard architectures with recommendations for optimizing insights and reporting.

SharePoint & Digital Workplace Modernization

Assessment of SharePoint Online modernization opportunities, including information architecture, migration planning, and governance.

You receive a strategic blueprint for your next phase of growth.

- ✓ A detailed **Summary of architecture assessment findings**.

- ✓ An actionable **Roadmap outlining AI and modernization opportunities**.

- ✓ A thorough **Security and compliance evaluation** with key results.

- ✓ A **Recommended plan for next-phase implementation** to drive continued progress.

Begin your transformation journey today.

To begin, schedule a consulting engagement with iSoftStone. Our experts will evaluate your current architecture, identify opportunities driven by AI, and define a practical roadmap tailored to your needs.
