

A POWERFUL TOOL FOR DATA ANALYSIS

but that should be operated and used correctly

In an increasingly data-driven world, it's essential to present information that is relevant and meaningful to your stakeholders. With Power BI, the industry-leading business intelligence platform from Microsoft, you can not only visualize data, but also gain insights that drive your business forward.

OUR TOOLBOX FOR POWER BI

so that you too can claim the full power

Have you already introduced Power BI in your company or would you like to do so? We have a range of packages and services that will make it much easier for you to use, implement and operate.

Contact us for more information.

POWER BI SOLUTIONS FROM IT-LOGIX

Our services for the introduction, use and operation of Power BI

REALIZATION

ARE YOUR REPORTS IBCS-COMPLIANT?

Are you having problems implementing your Power BI reports and dashboards according to your needs? You don't have the time to deal with countless tutorials? You simply want to get even more out of your reports?

WE IMPLEMENT POWER BI REPORTS FOR YOU

Our experienced experts work closely with you to understand your requirements and create meaningful visualizations. We use proven methods of data analysis to ensure that your reports are not only informative, but also user-friendly and IBCS-compliant.

COMMENTING & BUDGETING

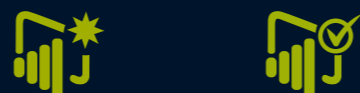

ENTER DATA AND COMMENTS DIRECTLY?

Would you like to be able to enrich, comment and budget your data in Power BI? Are you looking for a simple, flexible and secure solution to capture, annotate and save data directly in Power BI?

INFORIVER OFFERS THE SOLUTION FOR POWER BI

Inforiver is an add-in for Power BI that allows you to capture, annotate and save data directly in Power BI. Thanks to a custom visual for tables and charts, you can enter data directly in a Power BI report. Access rights are defined individually to ensure data security.

STARTER & CHECKUP PACK

RUN POWER BI SUSTAINABLY?

The lack of a clear authorization concept and development guidelines in Power BI can lead to a variety of challenges that affect the efficiency, security and consistency of reporting.

THE RIGHT START OR TRACK CORRECTION

With our development guidelines and the authorization concept, you can use Power BI optimally and securely. In a joint kick-off, we identify your current challenges and define the main areas of focus. The subsequent recommendations for action are based on this analysis and the desired target state.

DATA MODELING

ARE YOU STILL CLICKING EVERYTHING TOGETHER IN EXCEL?

Do you know which figures are relevant for you, but find it difficult to create a suitable model and link your data? Are you reluctant to take the step to Power BI because you don't know how to map your Excel analysis?

A SOLID BASIS FOR YOUR CONTROLLING

Take advantage of the modeling options that Power BI offers you. In addition to step-by-step instructions in iterations such as "Budget Variance Analysis", "Time-based Variance Analysis" and "Contribution Margin Analysis", our tutorial provides you with indepth knowledge of the individual patterns, as well as references to further literature and much more.

PLATFORM SERVICE

STABLE OPERATION AND FURTHER DEVELOPMENT?

Neglecting professional support and continuous development of Power BI can lead to various problems that affect the efficiency, data accuracy and added value of the platform.

REACH THE NEXT LEVEL WITH US

We take care of the operation of the platform and support you with our expertise to ensure smooth operation. Benefit from continuously optimized performance so that you always get the best performance from your environment, with maximum security.

CUSTOMIZED COACHING

ARE YOU USING POWER BI CORRECTLY?

Using Power BI in an organization without training tailored to the needs of the business can present several challenges, such as lack of efficiency or security risks.

WITH OUR TRAINING YOU REALLY CAN

You will receive comprehensive training in the use of Power BI for end users, visualization with Power BI, Power Query up to intermediate tasks, and DAX. The expert workshops give you the opportunity to ask questions about Power BI Desktop, Power Query and DAX.
