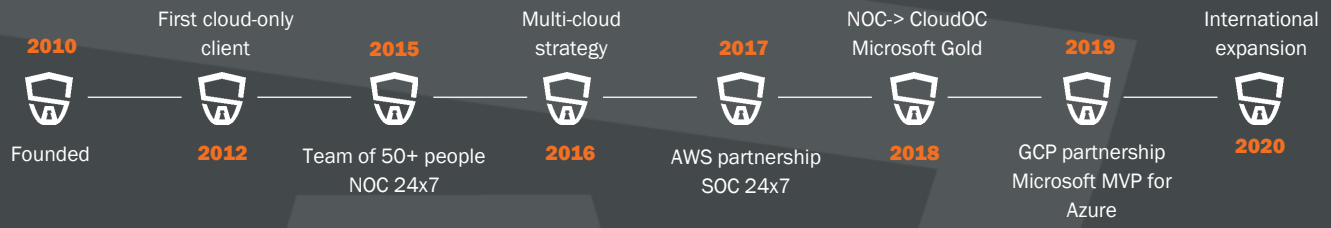
Meet the SUPERADMINS

Certified Cloud Experts

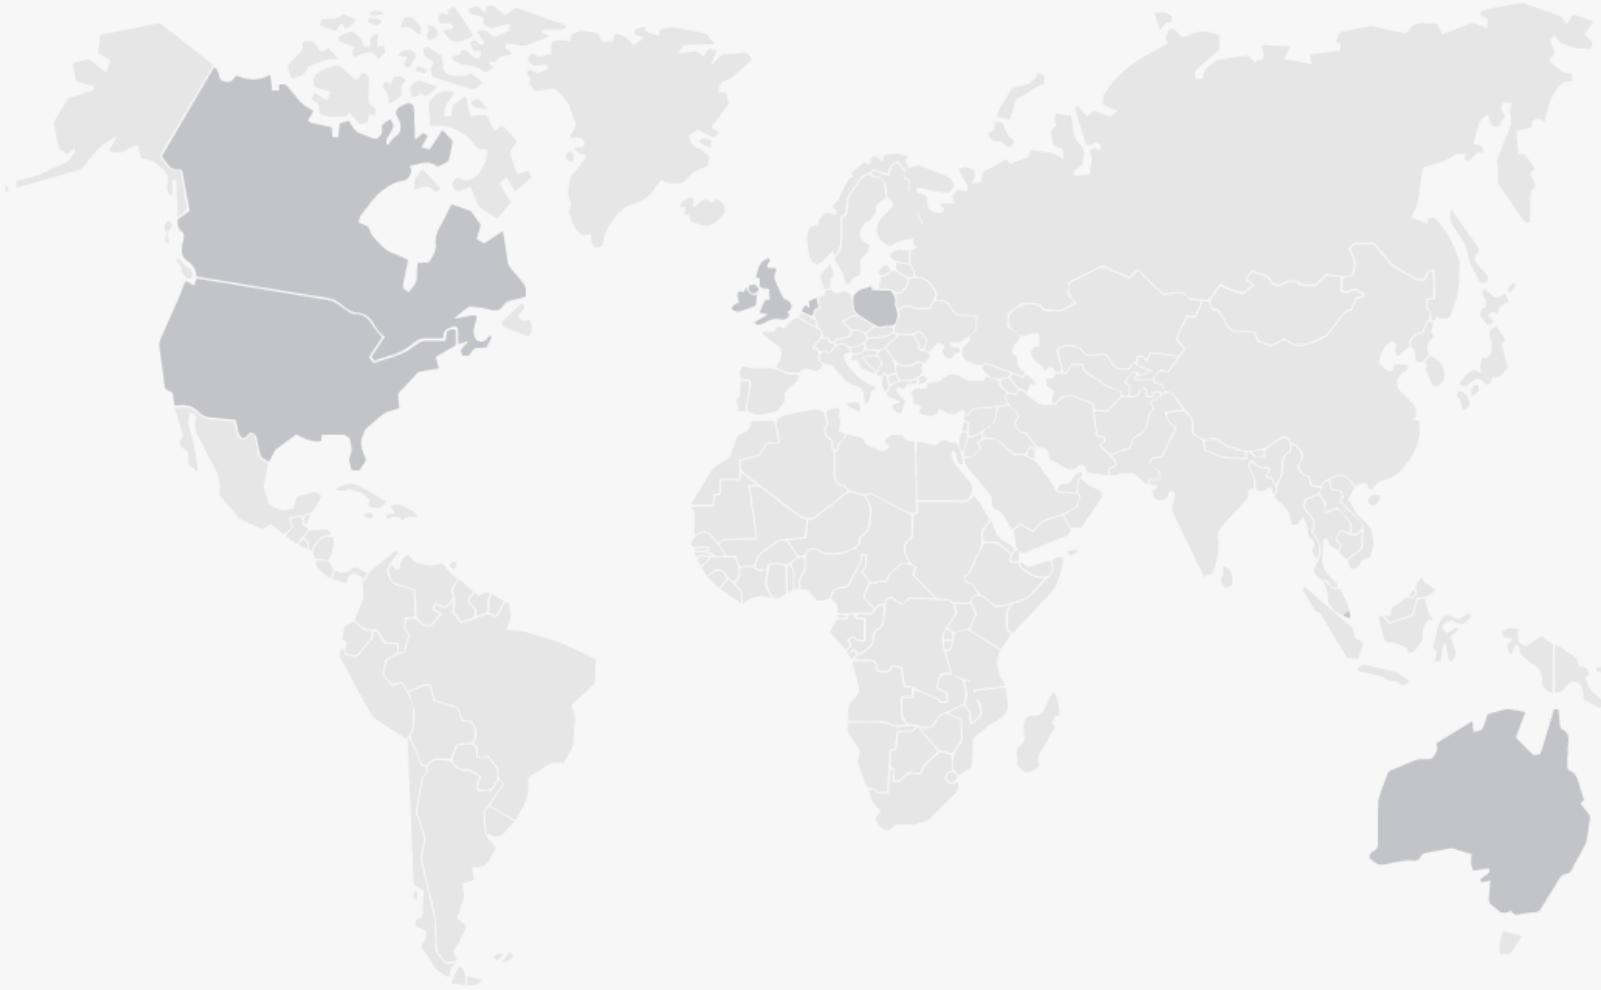
Born in
the cloud.

Who are SuperAdmins?

SuperAdmins is an international company dedicated to high competence in public cloud technologies and top-level client service.



Our excellence emerged from years of versatile international experience.



We have clients from three continents (and counting) and various profiles & industries.

We focus on:

Cloud native

Our 50+ engineers are certified, informed, experienced, communicative and focused on cloud technologies

End-to-end solutions

We work with clients from strategy to execution further into managing their cloud with 24/7 support

Cost optimization

TCO friendly service with cost predictiveness

Partnerships and certificates

With leading vendors in the industry

Experience & Expertize

More than 50 satisfied clients worldwide

But, it's all about the work mindset.
Our approach is result-driven,
for your benefit and ours.

So, what can you expect from SuperAdmins?

Attention to detail

Every project starts with thorough analysis and evaluation, so that we can understand your standpoint and propose the best strategy.

Thinking ahead

We are proactive and we carry the initiative necessary for you to exceed your KPIs.

Challenge-proof

Problem solving is not just our job, it's our culture.

Credible

We can always guarantee to deliver our promise and the highest-quality work.

On the same boat

SuperAdmins are not just your cloud experts. We are a partner. This means we will do the follow-up, provide you the support and push the limits of innovation.

SUPERADMINS

The services

Services we excel in

Public cloud

- Cloud design and provisioning
- Cloud enablement
- Cloud management
- Cost optimization

Sysadmin support

- Proactive support for a wide range of platforms
- Availability 24/7
- Fast response time
- Ticketing system, chat and voice
- Advanced troubleshooting

Public cloud

- CI/CD
- Infrastructure automation
- Project management support
- Experience with various DevOps tools

Network operation center

- Monitoring key equipment/services
- 24/7 availability
- Performing regular maintenance tasks

IT security

- Security operations center 24/7
- Security incident handling
- Penetration testing
- Infrastructure security
- PCI DSS Services

Technologies we support

Public cloud

AWS - Microsoft Azure - Google Cloud Platform

Orchestration tools

Ansible, Chef, Puppet, SaltStack, CloudFormation

CI/CD tools

Jenkins, Travis, GitHub, Bitbucket, CodePipeline, Azure Pipelines

Containerization

Docker, Docker Swarm,Kurbenetes, LXC

Virtualization

Server virtualization, VDI and App virtualization

Networking

Active network devices – L2/L3 switches, routers, firewalls, Load Balancers

Cloud and hosting billing/orchestration

WHM/cPanel, OnApp, HostBill, Plesk

Servers

Linux, Windows Server, OS with related services

Consumer technologies

Client operating systems (Windows), Office 365

How we work – case study

How SuperAdmins helped the ‘Awakening of Heroes’ project reach desired levels of scalability, stability and security in terms of app’s infrastructure

1.

The initial standpoint

AoH is a multi-player online game with players from all around the globe.

The brief for us was to ensure the complete scalability and responsiveness, while making sure the data is completely safe, latency is reduced to minimum and new app versions are deployed automatically.

2.

The approach

We decided to move the game to the cloud and ensure all the goals are met and exceeded.

SuperAdmins team created a Game Room and grouped the servers into 3 locations around the globe. To make sure the game experience is on top-level, we built a dynamic server infrastructure. This enabled a seamless scalability and new players integration at any given moment.

3.

Overall impact and result

A substantial boost in cost-efficiency. Through the usage of a dynamically scalable infrastructure, our client is now able to use only the servers that are necessary at that particular moment, and therefore optimize the amount of money spent on resources.

AoH infrastructure can now seamlessly grow along with the number of players, while each growth increment and its cost is easily predicted and optimized.

Our core team

Ljubiša Radivojević

Chief Executive Officer

Managing Partner, 15 years of experience Linux System and Network Engineer

Nikola Marković

Chief Technology Officer

Managing Partner, 15 years of experience, GCP, AWS Certified Solutions Architect

Veselin Mijuskovic

Chief Information Officer

Security expert, 20 years of experience, Professional Certified Google Cloud Architect

Rastko Vasiljević

AWS Team leader

5 years of experience, Certified AWS Solutions Architect, Linux System Engineer

Vladimir Stefanović

Azure Team leader

10 years of experience, Certified Azure Solutions Architect, Microsoft MVP

Dragan Grujić

NOC Team leader

Infrastructure Expert, 10 years of experience, Azure, VM Ware certified Associate
