

# ADFS TO AZURE AD APPLICATION MIGRATION

**Migrate seamlessly from Active Directory Federation Services (ADFS) to Azure Active Directory (Azure AD) with a simplified approach.**

Whilst ADFS remains a popular choice for many, the costs of maintaining infrastructure are high and the exposure of internal systems to the internet leave users at risk. With additional features such as password hash synchronisation, pass-through authentication, seamless single sign-on and more from Azure AD, there has never been a better time to consider a switch.

The straightforward solution is to utilise Azure AD's powerful functionality and famed advanced threat protection features, however, many organisations are unsure of how to get started.

ITC Secure's ADFS to Azure AD application migration service simplifies the transition and provides organisations with the confidence of how to begin. Throughout the migration journey businesses can tap into Azure AD's many features, improve their overall security, and create a roadmap for transformative security goals.

# SOLUTION OVERVIEW

ITC Secure assists organisations with their migration from ADFS to Azure AD, unlocking the many security and identity management features available. The service has been developed to ensure minimum disruption for end users, and begins with an information-gathering workshop with key stakeholders. The result is the introduction of robust authentication measures, stronger security, and a view of potential follow-up requirements – opening the door for a truly transformational security journey.

## KEY FEATURES AND BENEFITS

### Enhanced Security

- Better security, identity & response capabilities
- Enjoy features such as password hash sync
- Seamless single sign-on and Azure MFA

### Smooth & Controlled Transition

- Minimal disruption for end users
- Staged Azure to Azure AD as the identity provider
- Defederation of ADFS

### Roadmap for Further Migration & Automation

- Documentation of work completed
- Proposed priorities for any follow-on work
- Map out your security journey

Introduce seamless single sign-on and Azure MFA

Enhanced security via Azure AD's powerful features

Keep pace with threats, competitors, and wider security ambitions

A simplified migration with minimal disruption

## WHY ITC

ITC Secure is an advisory-led cyber security services company.

We have a 25+ year track record of delivering business-critical services to over 300 blue-chip organisations - bringing together the best minds in security, a relentless focus on customer service and advanced technological expertise to help businesses succeed.

With our integrated delivery model, proprietary platform and customer-first mindset, we work as an extension of your team throughout your cyber journey and always think not only about you, but also your customers and the reputation of your brand.

ITC Secure is headquartered in London, UK. With a dynamic balance of the best in people, technology and governance, we make cyber resilience your competitive advantage.
