

MICROSOFT 365 LICENCE OPTIMISATION HEALTH CHECK

Understand your Microsoft Identity and Security licensing position, deployment, and usage.

Licences are central to enabling users to access the tools they need to be productive but often there is a balance between cost and need. Only having licences available for existing and active users can result in delays when onboarding new staff; having spare licences can increase spend.

ITC Secure can provide the necessary insight for Microsoft 365 and Office 365 to enable you to understand the licence cost vs. consumption for your business allowing you to optimise existing and future investment decisions.

Our experts will gather, analyse, and report on findings to deliver:

Visibility of what is being used or disabled

Identification of stale and inactive users

Cost saving mechanisms

Workshop with ITC experts to review findings
