

## DISARM CYBERTHREATS AT THE SOURCE

The fast-changing global landscape is reshaping cybersecurity challenges to businesses worldwide.

### 01. TOO MUCH DATA

As your online presence grows, so does your digital footprint, making hidden vulnerabilities harder to detect.

### 02. FRAGMENTED TOOLS

Relying on multiple, single-purpose solutions creates gaps and inefficiencies, weakening overall security.

### 03. DEMOCRATIZED CYBERCRIME

AI and Cybercrime-as-a-service have lowered the barrier to entry, enabling even unskilled attackers to execute sophisticated cyberattacks.
