

MAXIMIZE YOUR CLOUD INVESTMENTS WITH CONFIDENCE

Surveil for Azure seamlessly provides FinOps-aligned data analytics and AI-powered procurement insights, enabling businesses to optimize and maximize costs, enhance security and governance, and drive business success. Ensuring superior performance, greater visibility, unmatched efficiency, and unparalleled value, Surveil for Azure is designed to meet the diverse demands of today's multi-tenant and multi-cloud environments and is the ideal solution for modern infrastructure needs.

- **Understand Cloud Usage and Costs:** Uncover hidden expenses, idle resources, and opportunities for cost optimization.
- **Combat Budget Wastage:** Address inaccurate cost allocations and inefficient procurement with smarter tagging and resource allocation.
- **Build Secure Azure Environments:** Utilize baseline assessments, zero trust-aligned intelligence, and enhanced security threat visibility.

PLATFORM CAPABILITIES

- FinOps Platform Certified Azure insights
- Multi-cloud cost visualization (Azure, AWS, GCP)
- Smart, customizable, and flexible tagging
- Precise budgeting and forecasting
- Cost allocation management
- Detailed chargeback reports
- AI-powered recommendations
- Cloud AI Assistant
- MACC Management
- Hybrid Benefits identification
- Agentless, read-only

BUSINESS VALUE

- **In-Depth Visibility and Control:** Achieve comprehensive visibility and control over business-relevant costs and consumption.
- **Cost Optimization and Alignment:** Optimize and align costs with business objectives and stakeholder expectations for improved financial management.
- **Enhanced Security:** Leverage zero trust intelligence and enhanced security threat visibility to mitigate risks.
