Integrated Security from Start

Embeds security practices within the development lifecycle from the initial design phase, ensuring vulnerabilities are addressed early. Fosters seamless collaboration between development and security teams, promoting a culture of shared responsibility for security throughout the application lifecycle.

Embedded security into developer workflows

Eliminated silos between development and security teams

Built a unified DevSecOps solution to develop apps securely

DevOps Tools To Use

Streamline your CI/CD processes by building, testing, and deploying across various platforms and languages with seamless GitHub integration for continuous delivery. Enhance team collaboration and project management by using agile tools to plan, track, and discuss work, ensuring timely delivery and value to users.

Azure Boards

Deliver value to your users faster using proven agile tools to plan, track, and discuss work across your teams.

Learn More

Azure Pipeline

Build, test, and deploy with CI/CD that works with any language, platform, and cloud. Connect to GitHub or any other Git provider and deploy continuously.

Learn More

Azure Repos

Get unlimited, cloud-hosted private Git repos & collaborate to build better code with pull requests and advanced file management.

Learn More

GitHub Advanced Security for Azure DevOps

Develop securely from inception to ship.

Learn More

Azure Test Plan

Test and ship with confidence using manual and exploratory testing tools.

Learn More

Azure Artifacts

Create, host, & share packages with your team, & add artifacts to your CI/CD pipelines with a single click.
