

ITQAN Copilot for Microsoft 365 APPS – 3 Weeks Implementation & Adoption

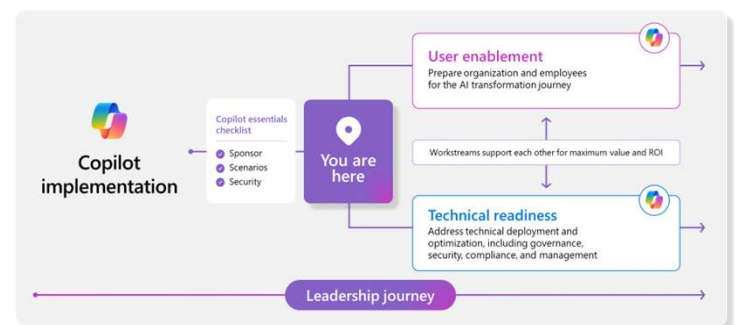

About ITQAN:

ITQAN is a Microsoft Gold LAR partner with Advanced Specialization, the highest recognition possible from Microsoft.

What we offer

Microsoft Copilot for Microsoft 365 is an AI-powered productivity tool that uses large language models (LLMs) and integrates your data with the Microsoft Graph and Microsoft 365 Apps. It works alongside popular Microsoft 365 Apps such as Word, Excel, PowerPoint, Outlook, Teams, and more. Copilot provides real-time intelligent assistance, enabling users to enhance their creativity, productivity, and skills.

- ITQAN will help customers in enabling Microsoft copilot within their organization and automate day to day activities.
- We will assess and provide recommendations in building a strong governance model for the data used by copilot users. Starting with an in-depth assessment of your current environment, providing a clear snapshot of your organization’s environment. The remediation actions will provide a secure and technically sound Microsoft tenant along with appropriate user permissions and access. Which then leads to the facilitation of Microsoft 365 Copilot enablement (dependent on licensing availability) with administrator and user testing.
- ITQAN will help in identify different user personas and use cases to adopt and implement copilot for entire organization.
- ITQAN will provide Admin Level and User adoption training.

Why Co-pilot?

Access to powerful AI models

- Built on the latest AI models (GPT-4 and DALL-E 3)
- No additional cost on eligible Microsoft licenses. Availability for F3 is coming soon

Transparent and current

- Citations provided for each response
- Responses sourced with up-to-date information

Business data is protected

- Chat data is not saved
- No eyes-on access
- Chat data is not used to train the model

Your Business data is protected

Copilot is AI-powered web chat with **commercial data protection**

Chat data is not saved

Chat prompts and responses are discarded.

No eyes-on access

No one at Microsoft can view your data.

Data is not used to train the model

Chat data is not used to train the large language models used by AI.

Microsoft 365

Microsoft 365 is a cloud-based subscription service that brings together the best tools for the way people work today. By combining best-in-class apps like Excel and Outlook with powerful cloud services like OneDrive and Microsoft Teams, Microsoft 365 lets anyone create and share anywhere on any device.
