

The background image shows a medical professional (a doctor) and a nurse sitting at a table. Between them is a small, friendly-looking robot. In the background, there are medical monitors displaying vital signs like an ECG and a patient's profile. The entire image is overlaid with a blue-to-purple gradient.

# AI Clinical Notes for Telehealth

# About our solution

The application alleviates clinicians' administrative workload by automatically and precisely documenting patient encounters. This streamlined approach saves time, increases satisfaction, enhances patient experiences, improves operational efficiency, and results in better financial outcomes.

The application workflow captured teleconference transcript data and used it to create patient encounters with automatically generated SOAP notes.

## Encounter creation

Encounter\*

Kayla Lewis - Initial Treatment

Patient\*

Kayla Lewis

 SOAP notes were auto-generated based on the meeting transcription, please review them before continuing.

Subjective\*

Patient Kate reports having a fever and not feeling well.

Objective\*

Mild fever noted. Blood pressure recorded at 120/80, which is within the normal range.

Assessment\*

Mild fever.

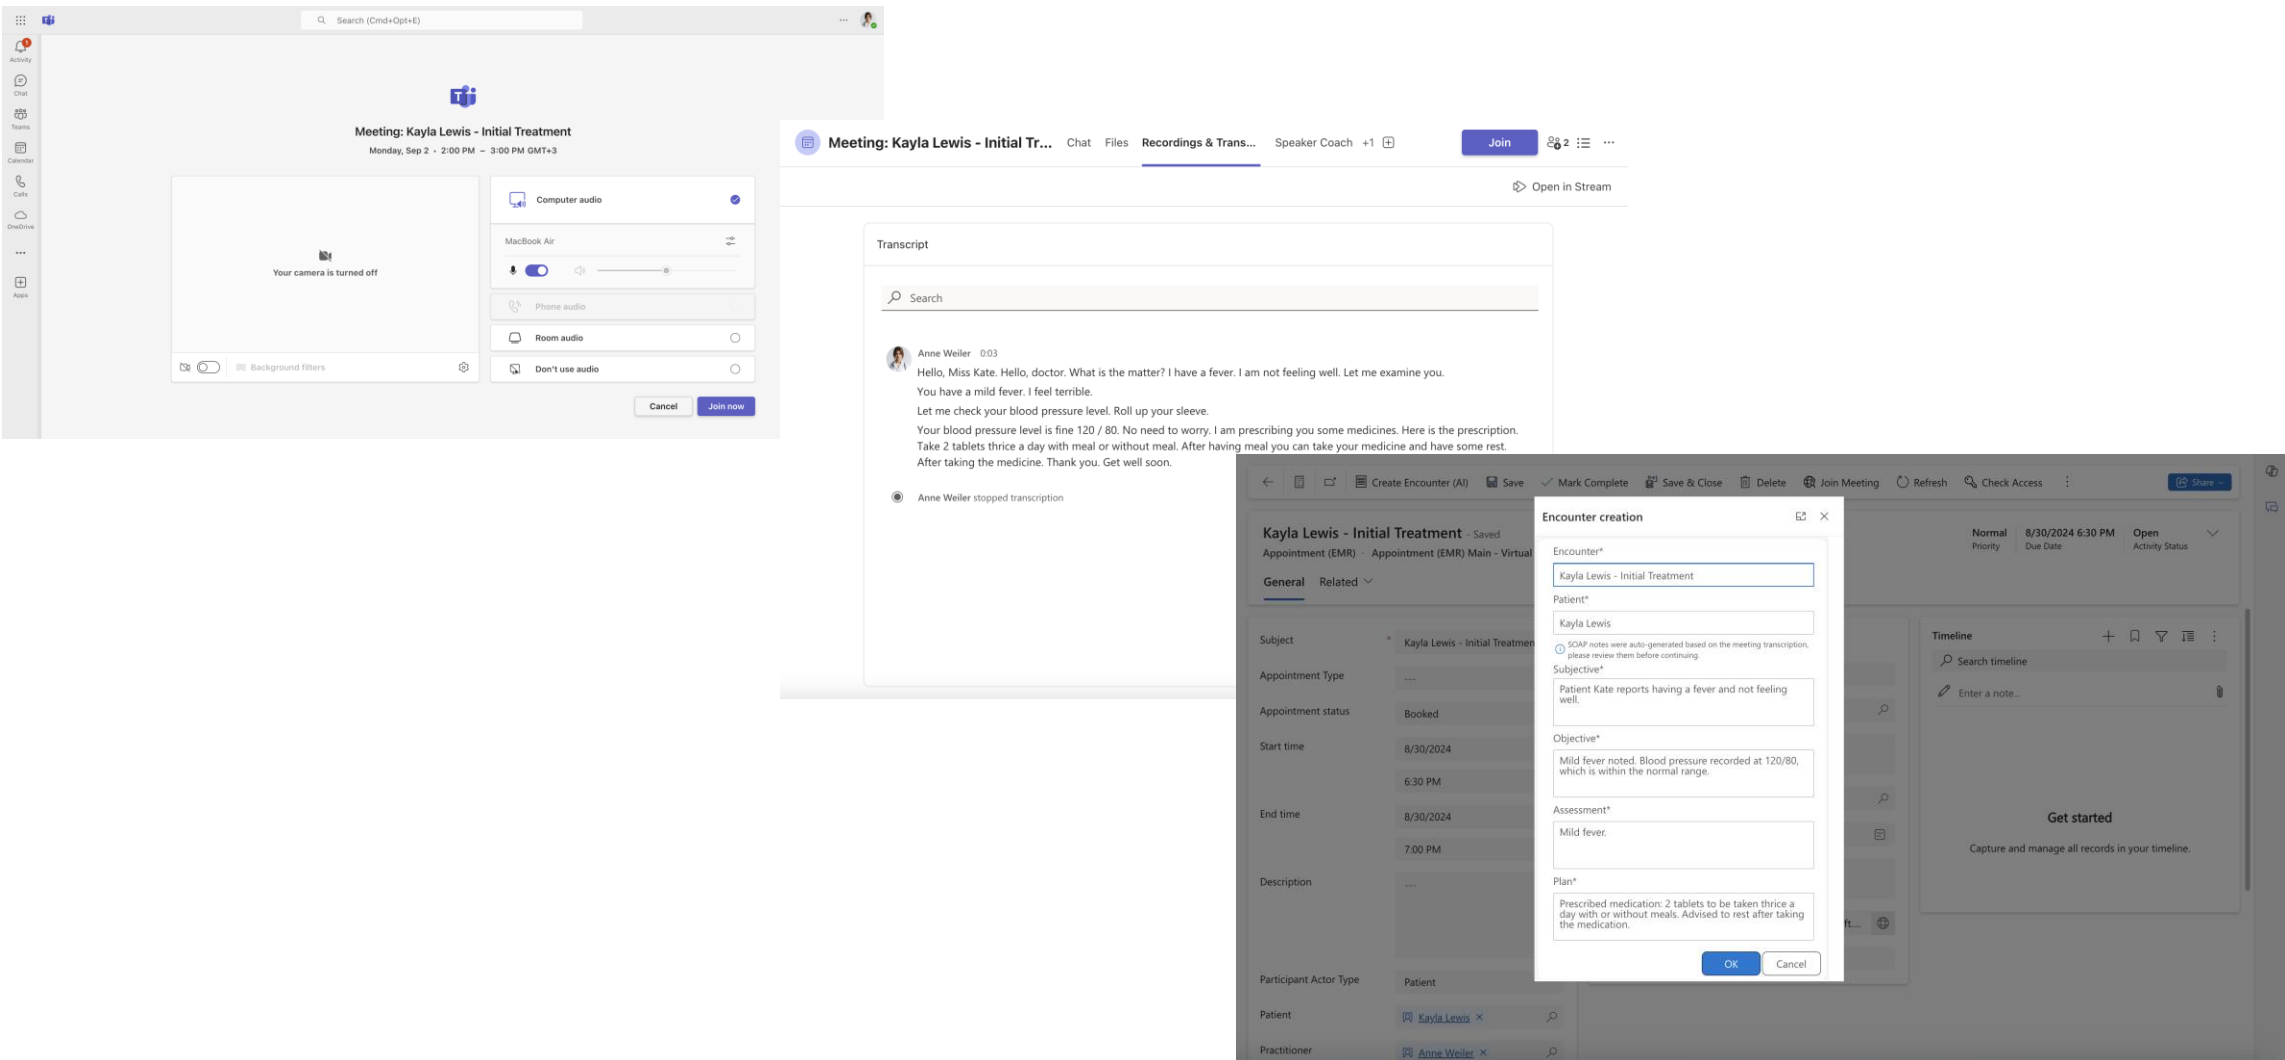

Plan\*

Prescribed medication: 2 tablets to be taken thrice a day with or without meals. Advised to rest after taking the medication.

# One-click clinical notes creation

# Benefits of using AI for clinical notes automation

- ✓ Enhances the quality of care and elevates the patient experience
- ✓ Enhances throughput and operational efficiency
- ✓ Optimizes workflows
- ✓ Elevates clinician satisfaction
- ✓ Strengthens financial outcomes

# Why us

## Microsoft Cloud Partner

- Microsoft partner since 2008
- Deliver systems on Azure since 2010
- Boast skilled certified Azure professionals
- Provide a full spectrum of Azure services (consulting, development, migration, DevOps)
- Leverage partner-specific opportunities and resources to deliver top-tier services

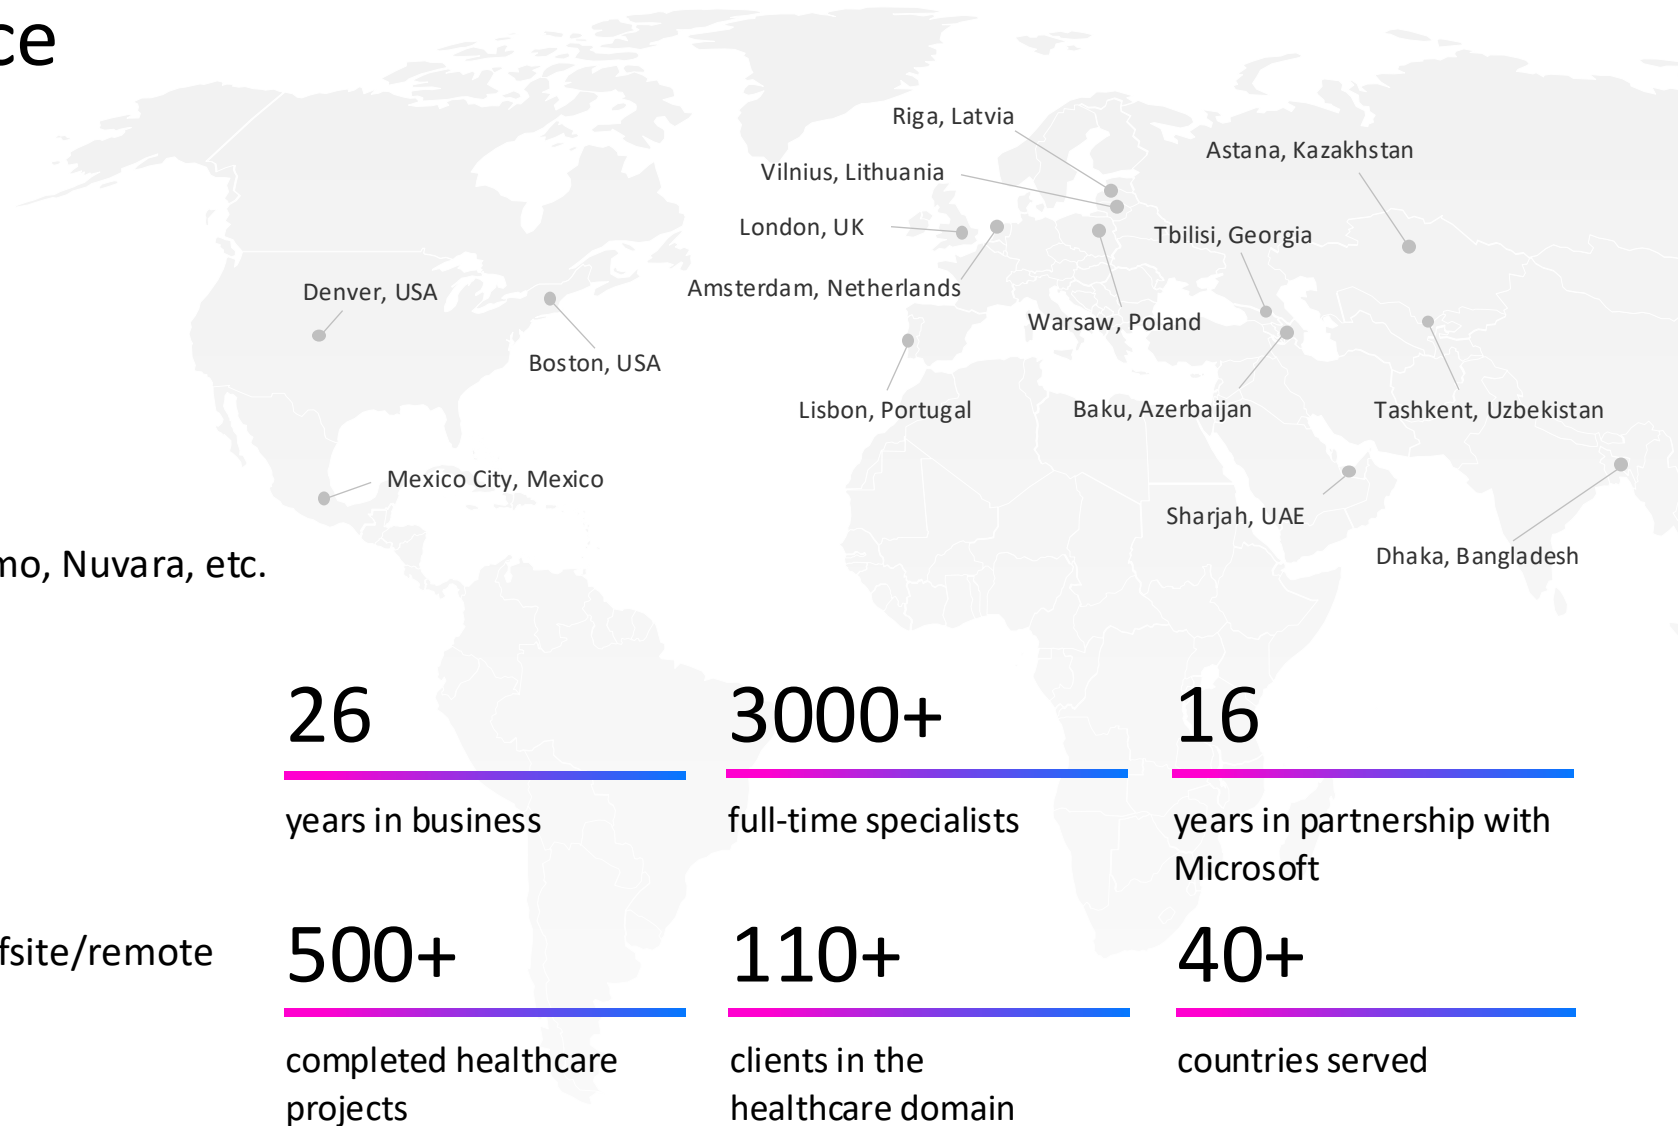

**Ittransition**  
+  
**MS Cloud for  
Healthcare**

## Healthcare Center of Excellence

- Study and implement healthcare-specific business processes and technologies
- Accumulate healthcare expertise and best practices
- Enhance the expertise of our healthcare specialists to ensure deep understanding of domain specifics

# Transition at a glance

- Full-cycle digital solutions & IT services provider
- Strong IT & technology consulting capabilities
- Leading healthcare customers: Terumo, Nuvara, etc.
- Deep tech expertise supervised by CTO office
- Processes maturity
- Scalability (combination of onsite/offsite/remote modes)
