Meter Data Management

North Bound Web Services API

South Bound Web Services API  
Including TALQ and OSCP

# Advanced CMS Functionality

## Reliable Command and Control

DATA HISTORY

REAL-TIME CONTROL

FAILURE TRACKING

- » Streetlight real time control/command
- » Dynamic lighting scenario
- » Configuration / commissioning services
- » Streetlight Alarm services
- » Streetlight Reporting services

# Advanced CMS Functionality

Flexible Scheduling and dimming services

GROUP SCHEDULING

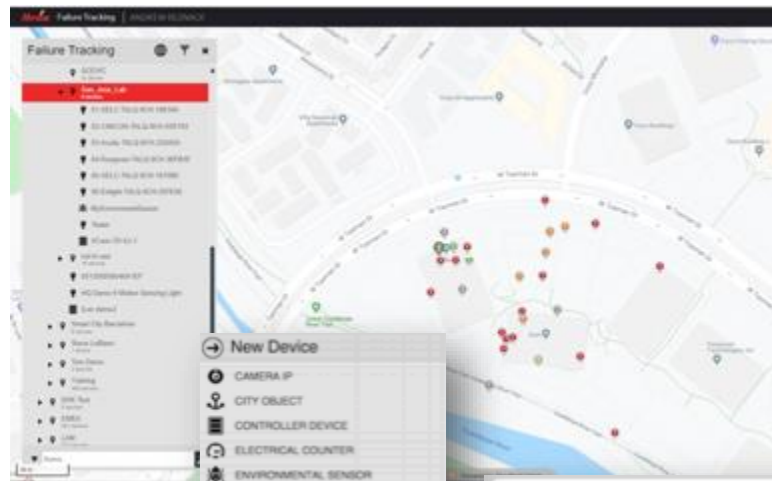

- » Internal astronomical clock
- » Scheduling services
- » Back up photosensor
- » Flexible control programs
- » 365-day calendar of control

# Advanced CMS Functionality

## Asset Tracking/Health

- » Multiple map-sources/ GIS
- » Ability to track multiple device types
- » Add attributes of your choosing to devices
- » Tracks and monitors 21 failure modes
- » Localized failures

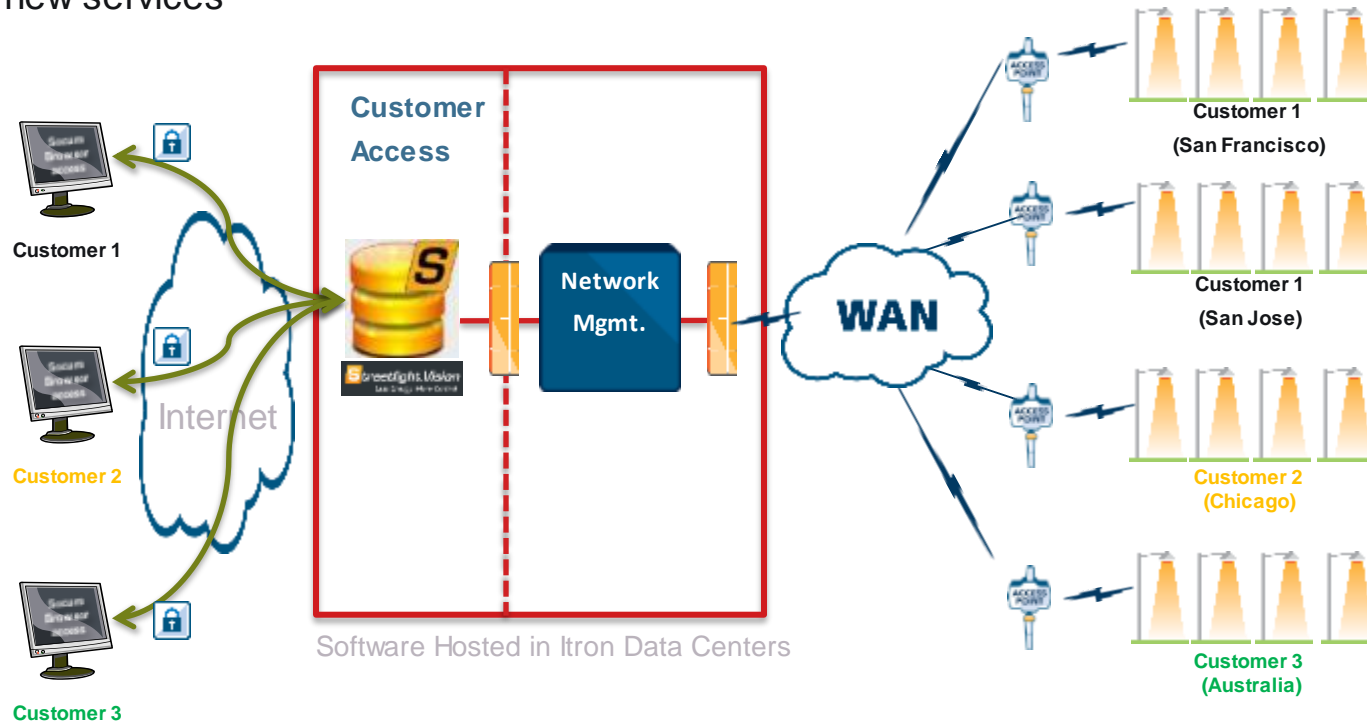

Asset Tracking/Health

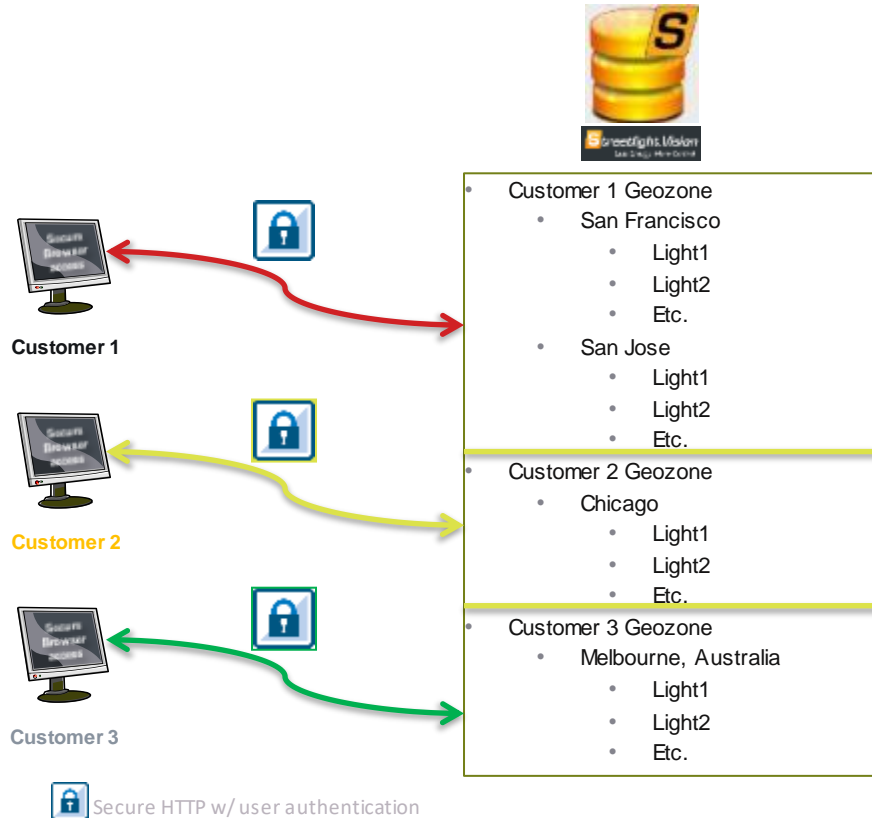

# Multi-tenant SaaS Architecture

Enabling new services

 Secure HTTP w/ user authentication

# Streetlight.Vision Security

- » Per Customer
  - Dedicated Geozone
  - Support for multiple sub-regions
  - Unique Authentication
  - Support for multiple sub-accounts
- » No customer access to underlying servers or database
- » Centrally managed by Itron Global Managed Services
- » Cost effective solution

# SMART CITY CASE STUDIES

Our multi-purpose platform enables a range of IoT use cases

GUANGZHOU

## BUILDING AN IOT-READY CITY

### PROJECT OVERVIEW

- » 80,000 intelligent streetlights
- » Multi-network streetlight deployment
- » Smart poles feature integrated air quality sensors, pedestrian counters, traffic sensors, noise sensors, and motion sensors

### BENEFITS

- » 75% energy savings
- » 28%Operational savings
- » Reduced crime
- » Unified head-end for managing multiple lighting deployments
- » Minimize physical mounting infrastructure for smart devices

CITY OF  
PARIS

## IMPROVING MULTIPLE CITY SERVICES

**OVERVIEW:** Paris has committed to reduce public lighting energy consumption by 30 percent over the next 10 years while ensuring quality lighting for residents.

### APPLICATIONS & GOALS

- **PROJECT PILOT:** Quickly demonstrated improved lighting efficiencies by starting with a tightly scoped city initiative
- **SMART STREET LIGHTING AND TRAFFIC SIGNAL CONTROL:** IoT network canopy connecting 200k street and traffic lights across the city
- **IPv6-BASED MULTI-APPLICATION NETWORK:** Creating a platform for future services

CPS ENERGY  
SAN ANTONIO, TX

## MULTI-APPLICATION

### CHALLENGE

- » Drive greater operational efficiency and grid reliability for the nation's largest electric & gas combined municipal utility

### SOLUTION

- » Smart, multi-purpose network for electricity and gas AMI
- » Distribution Automation
- » Demand reduction
- » Smart streetlighting pilot

### RESULT

- » 82% reduction in manual meter reads
- » 53% reduction in truck rolls
- » 87% increase of remote reconnects & disconnects
- » Exploring additional smart city applications

ILLINOIS, USA

## IMPROVING RELIABILITY & EFFICIENCY

**46%** REDUCTION IN FREQUENCY OF CUSTOMER INTERRUPTIONS

“The smart grid program is delivering on its promise to generate efficiencies and we are pleased to pass-along those savings to our customers by decreasing their electric delivery costs.”

— Anne Pramaggiore, President and CEO,  
Commonwealth Edison

CHICAGO, USA

## BRIGHTER, SAFER AND MORE EFFICIENT STREETS

**\$100M** PROJECTED ENERGY SAVINGS OVER 10 YEARS

“By converting our streetlights to LED technology, we are modernizing Chicago’s infrastructure, creating new jobs and saving taxpayers more than \$100 million over the next decade. Once the new smart lighting system is operational, we will also be notified when lights go out – and this will eliminate the need for residents to call 311 to report outages.”

– Rahm Emanuel, Mayor, City of Chicago

FLORIDA, USA

## DELIVERING SMART CITY VALUE

- » Largest street light control network worldwide
- » Leverages existing smart grid network consisting of >5M smart devices
- » Accelerated restoration using automated failure detection
- » 60% energy savings
- » Improves monitoring to protect wildlife during turtle hatching season

SAN ANTONIO USA

## MULTI APPLICATION NETWORK

### PROJECT SCOPE:

- 3 Innovation Zones including
  - Smart Streetlight controls
  - Weather Station
  - Water level monitoring
  - Noise sensors
  - Parking sensors
  - Air Quality sensors

### OUTCOMES:

- Single CPS Energy Network for:
  - Electric & Gas (CPSE)
  - Smart City applications (City)
  - Water (SAWS)
- SLV used for Smart City data

© Tom Marek

MULTIPLE LOCATIONS, USA

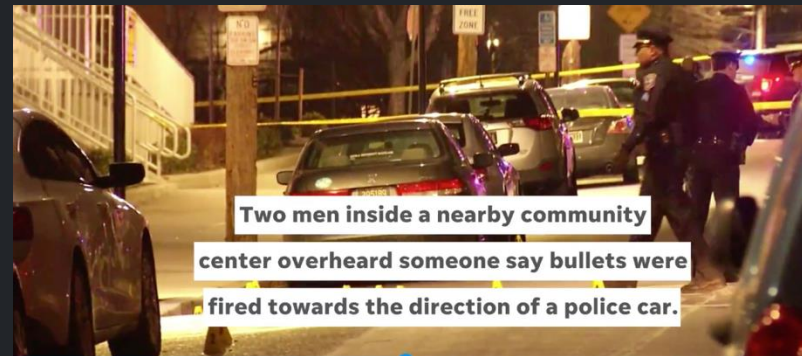

## PUBLIC SAFETY & SECURITY

### PROJECT SCOPE:

- Using IOU AML & Streetlight Network
- Installation of gunshot detection & location sensors
- Synchronization with city / PD CCTV Cameras for crime scene forensics
- System deployed in multiple locations and multiple gunshot events detected
- System can differentiate fireworks from gunshots

### OUTCOMES:

- Enhanced Public Safety with increased deterrence and shorter PD response times

MIAMI-DADE USA

## WASTEWATER FLOW MONITORING

### PROJECT SCOPE:

- Mitigate sanitary sewer overflows
- Remove wastewater basins from regulatory moratorium
- Simple management of regulatory compliance data
- Integrate Water AML data with Wastewater flow data to identify Utility's Real Infiltration & Inflow

### OUTCOMES:

- Reduced truck rolls by 60%
- Eliminated the need for outsourced I&I reporting
- Established a permanent maintenance monitoring solution for the gravity sewer system

COPENHAGEN, DENMARK

## ENHANCE SUSTAINABILITY & COMMUTER SAFETY

- » 76% energy savings from dynamic dimming

## WASHINGTON COUNTY SERVICE AUTHORITY

### OVERVIEW

- Western Part of VA
- ~23,000 water meters

### CHALLENGES

- Aging infrastructure
- Rising operational costs

### SOLUTION & BENEFITS

- Utilization of Network-as-a-Service
- Lower operational costs
- Lower maintenance costs
- Easy transition from AMR to AMI
- Temetra for improved meter reading
- Access to Customer Portal
