COPILOT READINESS CHECK

Get off to a flying start with ITVT

The Copilot Readiness Assessment is essential for organizations aiming to integrate AI-powered tools like Copilot into their daily operations smoothly. With Copilot for Microsoft 365, you can:

- **Automate routine tasks** and save valuable time.
- **Optimize teamwork** by streamlining collaboration across Microsoft 365 apps.
- **Gain smart insights** to enhance decision-making throughout the business.

Why a Readiness Assessment Matters

To unlock these benefits, your organization must be prepared for a smooth and secure transition. Our Copilot Readiness Assessment evaluates three key areas:

- **IT Infrastructure:** Identify any technical upgrades needed to ensure smooth operation.
- **Data Protection Policies:** Ensure compliance and optimize data governance strategies.
- **User Readiness:** Assess training and adoption strategies to empower your team.

Benefits
- **Identify areas for improvement:** Pinpoint where upgrades or adjustments are needed.
- **Eliminate risks:** Address potential security gaps or technical barriers before implementation.
- **Ensure compliance:** Avoid legal risks with optimized data governance.
- **Maximize productivity:** Prevent disruptions and inefficiencies from impacting operations.

By knowing your organization's readiness upfront, you can proactively close gaps and ensure a seamless Copilot integration—avoiding costly delays or disruptions down the line.

TECHNICAL INFRASTRUCTURE

The assessment evaluates whether your current technical setup including hardware and network capabilities can support Microsoft 365 Copilot.

SOFTWARE COMPATIBILITY

Compatibility with existing software systems is crucial. The assessment ensures that your Office applications and other software can seamlessly integrate with Copilot.

EMPLOYEE SKILL LEVEL

The digital literacy of your workforce is key to adapting new technologies. Our assessment identifies the training needs to make your team Copilot-ready.

DATA READINESS

Microsoft 365 Copilot leverages your organizational data. The assessment checks the readiness of your data in terms of quality, structure, and accessibility.

Maximize Innovation with a Copilot Readiness Assessment

Investing in our Copilot Readiness Assessment ensures your organization is fully equipped to unlock the potential of AI-powered tools like Copilot—driving innovation, streamlining workflows, and boosting productivity across all departments.

We are happy to advise you!

Investing in our Copilot Readiness Assessment ensures your organization is fully equipped to unlock the potential of AI-powered tools like Copilot—driving innovation, streamlining workflows, and boosting productivity across all departments.

The assessment helps you:
- **Evaluate your current infrastructure** to ensure it can support Copilot's advanced features.
- **Identify security gaps** to safeguard your data and ensure compliance.
- **Identify user adoption strategies** to empower your team for effective AI integration.

With a clear understanding of your organization's readiness, you can seamlessly integrate Copilot, boost collaboration, and optimize business processes—positioning your team to achieve long-term success with AI-powered solutions.
