

# Azure Cost Optimization: 5-day Assessment

Maximize your cloud savings with ITX360's Azure Cost Optimization. Our 5-day assessment helps businesses control cloud costs and implement optimization strategies.

# Why Choose ITX360

Achieve Significant Savings

Optimize cloud expenses by 30-40% or more in environments not yet fully optimized.

Tailored to Your Needs

Receive a comprehensive optimization checklist with clear, actionable insights.

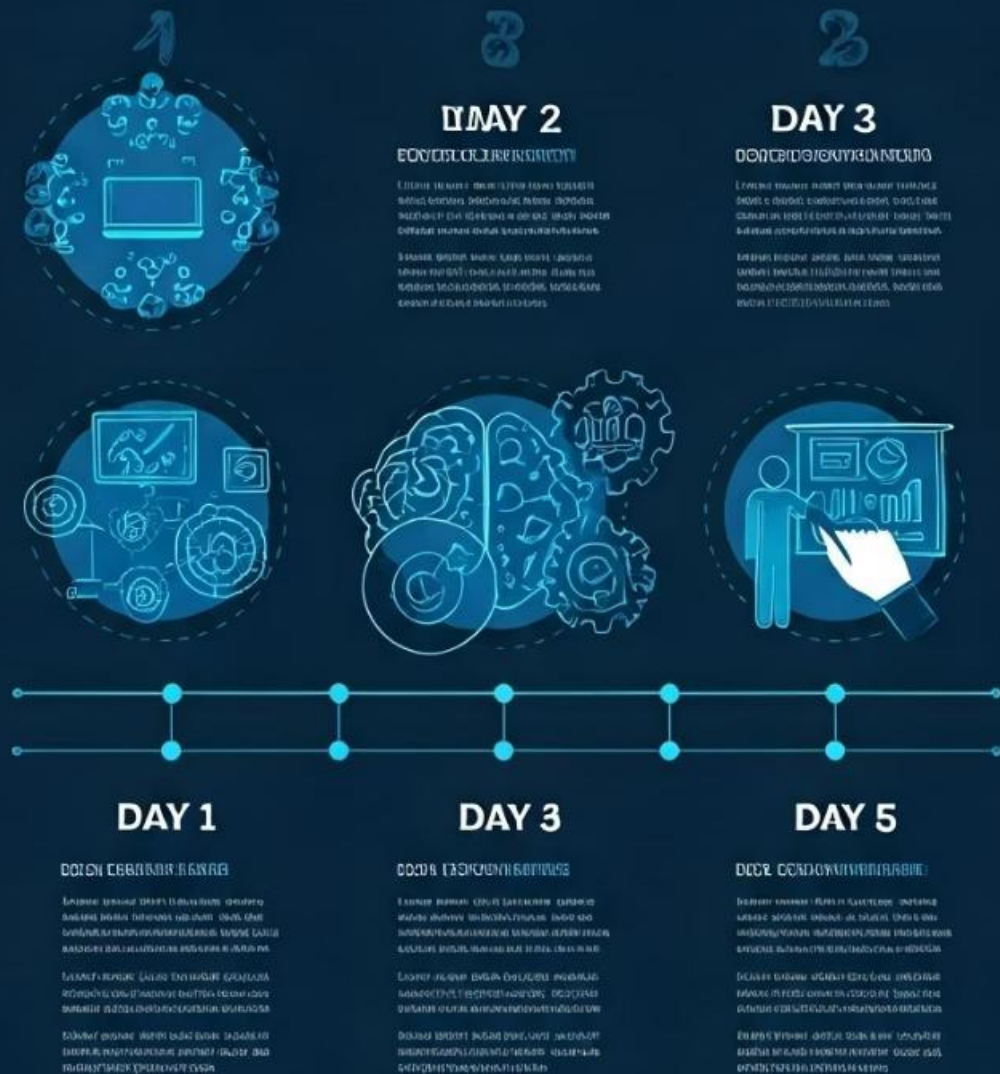

Strategic Recommendations

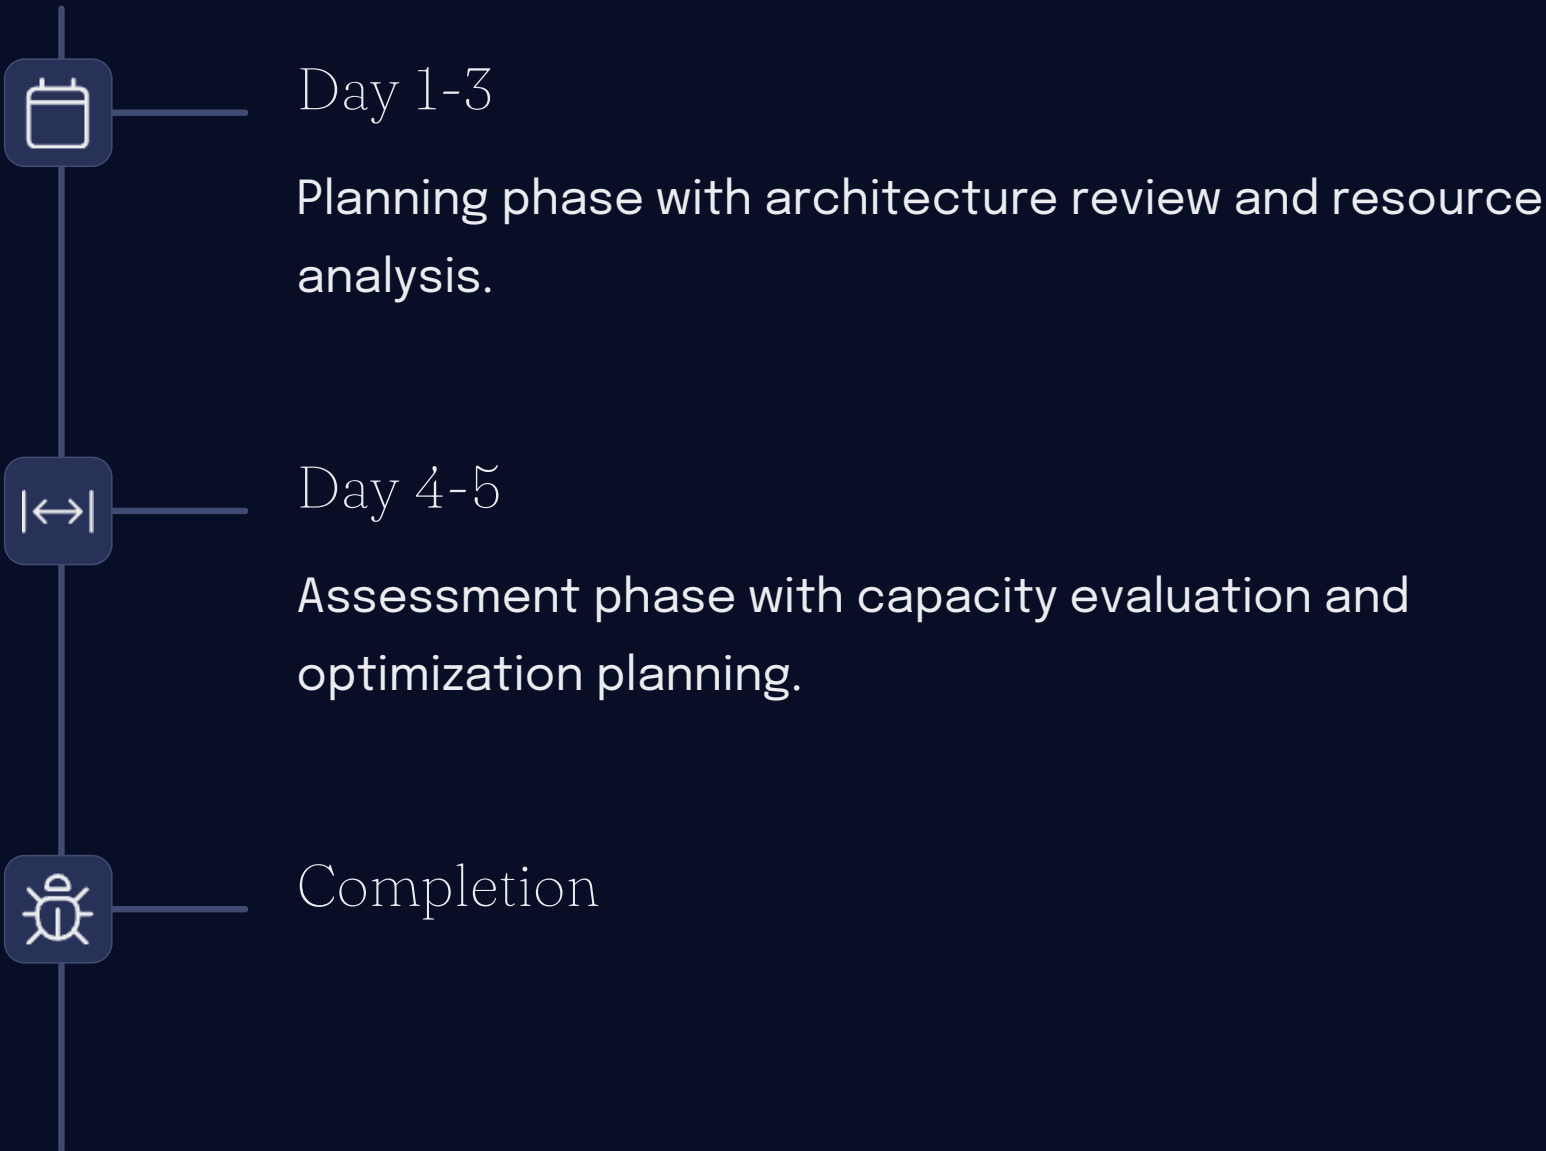

Get expert advice on architectural changes to reduce costs, optimize performance and improve scalability of your Azure environment.

## 5 DAY ASSESSMENT PROCESS

# Assessment Overview

# First 3 Days: Agenda

Introduction to ITX360 Azure expertise

Definition of Scope for assessment

Current Azure Architecture and Business review.

Azure Resource Analysis

Azure Resource Cost Analysis

# Deliverables

Azure Resource cost utilization reports

Unused Azure resources lists

Resource performance utilization reports

Azure Logical Diagrams

# Last 2 Days: Assessment Phase

## Agenda

- Asses the Azure resources capacity compared to resource utilization.
- Asses the Azure Dev/test environment compared to resource spec and utilization.
- Assess of Scaling plan and uptime of azure resources
- Azure Policy Review for restrict resource deployment.
- Design Reserved Instance, Saving Plan for Workload
- Identify the Architectural changes which can reduce the costs.

# Deliverables

1

Actionable insights report to streamline costs.

2

Expected Reduction Costs Estimate

3

Project Plan for Cost Optimization Plan Execution

4

Expected logical Diagram after the cost optimization
