- *Rollout-plan*

Why *Microsoft 365 Copilot Enablement*?

Basic Service Components

Say Hi to Microsoft 365 Copilot

We will introduce you to Microsoft 365 Copilot, a service that uses OpenAI, a powerful artificial intelligence platform, to help you improve your productivity and user experience. We will explain how Microsoft 365 Copilot works, what benefits it can bring to your organization, and how you can use it effectively.

Prepare, Assess & Get going

We help you to assess your organizations readiness and how to achieve your goals with Microsoft 365 Copilot. We also help you with the prerequisites, define scope and expected outcome, and show the benefits of enabling and evaluating Copilot for the participants. The workshop is designed to empower the participants with the skills and knowledge to use Copilot effectively and efficiently.

Build a plan

We will help you to prepare your environment for Microsoft 365 Copilot, by checking the compatibility and readiness of your devices, network, and general security settings. We will also help you to set a timeline and estimated cost for the deployment and help you define your goals and success criteria.

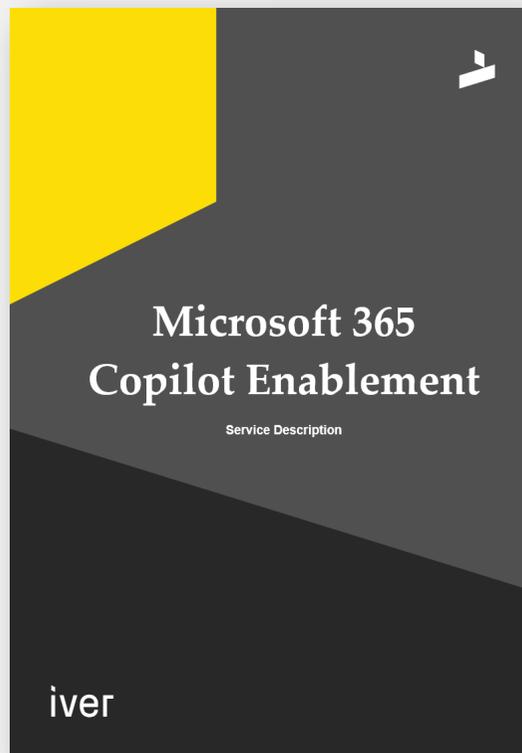

Assessment Reports

The assessment will evaluate, among other things:

- General Microsoft 365 Configuration
- Data Security Readiness
- Productivity Tool Readiness
- Organizational Profile Readiness
