

Copilot for Microsoft 365 QuickStart

Our Approach

ivision's Copilot for Microsoft 365 QuickStart evaluates and captures technical requirements for readiness and baseline security strategies for leveraging AI responsibly. ivision then will map your Copilot readiness to relevant service capabilities and identify Quick-Win priority use cases to realize value rapidly. We work with your team to drive adoption and employee communications assets to define a repeatable framework that drives Copilot adoption across your business.

Common Challenges

- No comprehensive understanding of business value for Generative AI, orchestration and automation possibilities.
- Manual tasks and activities that lack opportunity for optimization, efficiency, and automation
- Lack of a Data Governance & Zero Trust Security framework to prepare for a responsible AI model that is scalable.
- Comingled content and processes disbursed across multiple IT tools and solutions, lacking AI capability for building adaptable, intelligent work insights and orchestration

Benefits

- ✓ Proven techniques for developing enhanced productivity and cohesive collaboration with modern AI toolsets and identify quick-win use cases.
- ✓ Integrated AI solution built into your favorite Microsoft 365 Apps and Modern Workplace platforms, making it ideal for employees to realize great value across your organization.
