

# JitLMS - Learning Management System for Higher Education

*Modern LMS for universities and colleges - engage students and streamline academic delivery.*

Transform Higher Education with JitLMS

JitLMS is a modern Learning Management System designed to support universities, colleges, and online institutions in delivering engaging, flexible, and accessible learning experiences.

Built on the Microsoft Azure cloud, JitLMS helps academic institutions digitize course delivery, manage student progress, and scale learning programs with ease.

Key Features for Higher Education:

- Course scheduling, assignments, quizzes, and grading tools
- Integrated with Microsoft Teams and Azure Active Directory
- Support for SCORM and xAPI content standards
- Student and faculty dashboards with real-time insights
- Role-based access for faculty, students, and admins
- Secure and FERPA-compliant data handling

Designed for Modern Campuses:

- Intuitive mobile-friendly UI
- Integrates with existing SIS and identity systems
- Multi-language and accessibility support
- Easy deployment through Azure Marketplace

Prepare your students for the future with a powerful LMS tailored to higher ed success.
