J-AI Assistant for Video & Speech contents

GenAI Assistant"

JAKALA

GenAI Assistant

The virtual assistant (**AI Assistant**) is a conversational agent that optimizes management, enhances the customer experience, and increases participant engagement, ensuring quick and accurate access to information.

Event participants can access the AI Assistant via **QR Code.**

Agentic flow

The AI assistant orchestrates multiple specialized language models (**LLMs**), activating tools and services as needed. It processes user requests, selects appropriate solutions, and provides responses in a conversational manner with **relevant information like videos or programs**.
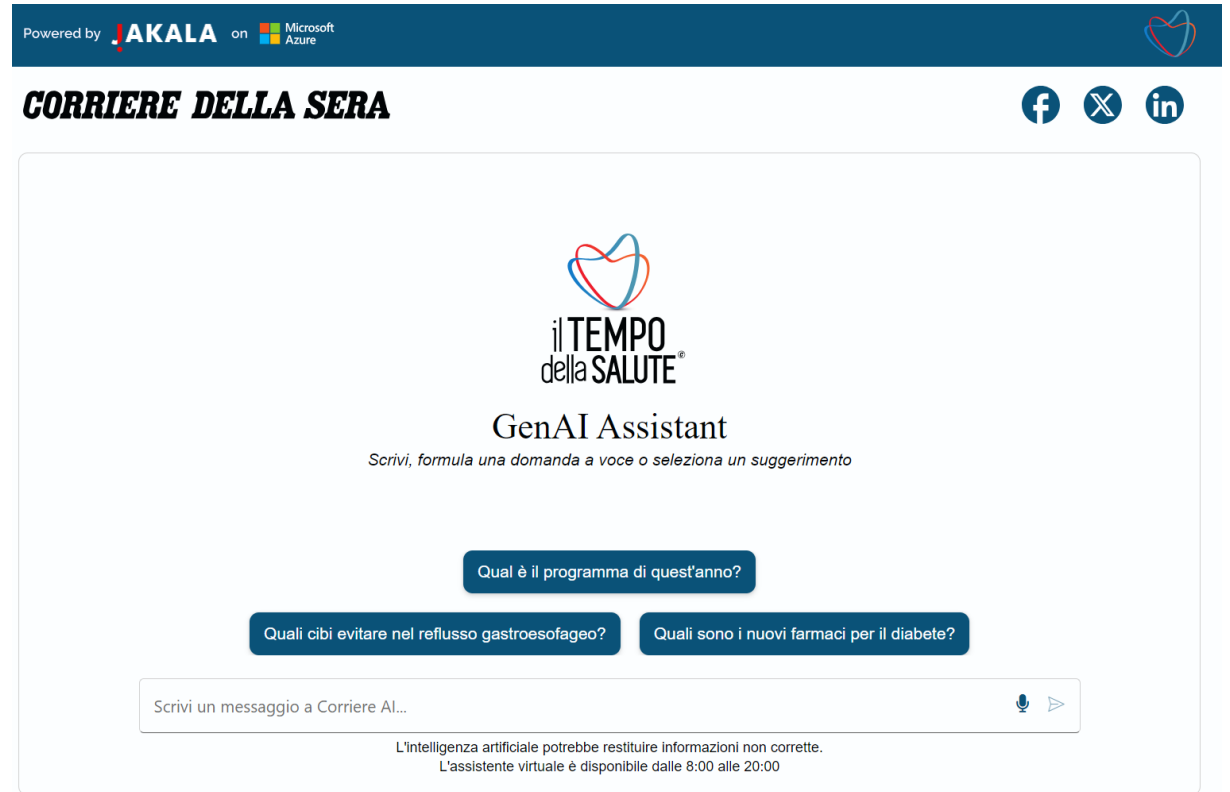

Portability & Scalability

Features a **cloud-agnostic architecture**, enabling rapid migration between cloud services and LLM providers. New functionalities can be easily integrated into the agent model.

Groundedness

Guarantees factually **accurate** and contextually appropriate responses by relying strictly on database sources, avoiding hallucinations or random patterns from the model.

Powered by **JAKALA** on **Microsoft Azure**

CORRIERE DELLA SERA

il TEMPO della SALUTE®

GenAI Assistant

Scrivi, formula una domanda a voce o seleziona un suggerimento

Qual è il programma di quest'anno?

Quali cibi evitare nel reflusso gastroesofageo?   Quali sono i nuovi farmaci per il diabete?

Scrivi un messaggio a Corriere AI...

L'intelligenza artificiale potrebbe restituire informazioni non corrette.
L'assistente virtuale è disponibile dalle 8:00 alle 20:00

Guardrailing

Ensures question relevance and response quality. **Answers** are provided only **for in-scope topics**, with suggestions for reformulations or alternative questions when needed.
