EMP Cloud

Enterprise Email Security

Overview

EMP Cloud
Enterprise Email Security

For two decades our on-premise server product EMP Email Security, has been protecting the email of businesses of all sizes, from spam and malicious content. Today the next generation of EMP is here and has moved to the cloud.

In addition to living in the cloud, EMP Cloud substantially expands the former EMP on-premise feature set. It will protect both on-premise email servers, as well as cloud based services such as Office 365 and Gmail.

Feature Highlight

EMPCloud
Enterprise Email Security

- Multiple level Antivirus

- Comprehensive Spam Filtering with Zero hour Outbreak Protection

- URL and Attachment Defense – Email Spooling – Instant Replay

- Active Directory Sync – Archiving – Forensic eDiscovery

- Data Loss Prevention – Encryption – Emergency Inbox
