

## World on Cloud – An Insight

The World on Cloud’s entire functioning is detailed within this document.

### Why World on Cloud? THE NEED!!!

- 95% Organizations are working remotely due to the ongoing global threat.
- 80% Employees at various companies quoted the ability to work from anywhere as their top perk.
- 70% Executives agree that the amount of time, money and resources spent on IT maintenance is affecting the overall competitiveness of their organizations

We are delighted to announce that we are a Service Provider IT company which has born in **The Amsterdam** to bring charismatic changes to not only help employees to enable them from just Work from home , but yes “Work from Anywhere” in this Pandemic – COVID-19 with the help of launching a Great IT enablement using the latest Public Cloud Technologies from Microsoft Azure and provisioning Windows Virtual Desktops to the masses with extra-ordinary features.

**Here We Proudly Present Our.....**

**.....World on Cloud.....**

More and more, organizations are looking for technology solutions that eliminate the burden of hardware and increase the mobility of their workforce. Perhaps one of the most attractive of these solutions is cloud desktops (also known as hosted desktops, virtual desktops or VDI), which essentially deliver computing power to any device connected to the Internet without the need for your own servers.

## **What is a cloud (virtual) desktop or DaaS (Desktop as a Service)?**

Here, we'll define a "cloud desktop" as a Windows-based virtual desktop that is being delivered over the Internet to your device (be it an iPad, laptop, PC, Mac, or otherwise).

In other words, any cloud desktop gives you that Windows desktop experience that we're all familiar with, but the actual World on Cloud (WoC's) computing power is coming from your Cloud provider's servers at a remote datacenter—not your own devices And That is from .....

### **"The Renowned Microsoft Directly --> Microsoft Azure Public Cloud"**

Features of DaaS (Desktop as a Service) using Windows Virtual Desktops are-----

- Security
- Manageability
- Agility
- Reduced TCO's (Total Cost of ownership)
- Flexibility
- Host 3rd-party applications on our desktop solution
- Easy to access environment
- Accessibility from Anywhere

## **What We Offer -->**

**A) Managed DaaS --> World on Cloud (WOC's) Managed Windows Virtual Desktop --> Main Content would be ---**

**Managed Windows Virtual Desktop** Seamlessly migrate your workloads to a secure full featured virtual desktop on Azure cloud and enhance your desktop experience with **World on Cloud's Managed Windows Virtual Desktop solution.**

Windows Virtual Desktops (WVD) is the ONLY desktop and application virtualization service that provides a multi-session Windows 10 experience on

the Azure cloud. It optimizes O365 experience and enables your IT team to transition existing Windows server (Remote Desktop Services) desktop and applications on Azure.

World on Cloud is among the first WVD service providers and sub-partners of Microsoft to successfully deliver Windows Virtual Desktop implementations. WOC's Managed WVD solution takes away the pain of provisioning, application integration, configuration, and end to end management of the complete server to screen WVD environment. The managed WVD provides, superior end user experience, high application availability, scalability, 24x7 proactive infrastructure monitoring, and timely provisioning of security patches and updates.
