

JBS Custom Software Solutions Success Stories

Innovating and Driving Enterprises Forward with Microsoft Technology

Delivered a Robust High-Traffic Ecommerce Solution

Architected a high traffic e-commerce website with custom features for **Music & Arts**, that included back-end Admin functionality, integrating with the retailer's enterprise product information systems and managing lesson availability.

Built a Modern Feature-Rich Data Warehouse

Reduced overall cost, streamlined new client onboarding processes, and provided a rich feature set of reporting functionality for **Food Safety Net Services (FSNS)**. In addition, this modern data warehouse solution creates multiple applications on top of it for the client's specific needs.

Delivered Mobile-Focused App for Faster Processing

Created a customizable mobile-focused loan application submission app to meet **Builder Finance**'s specific needs, allowing the bank to process customer applications more efficiently and quickly.

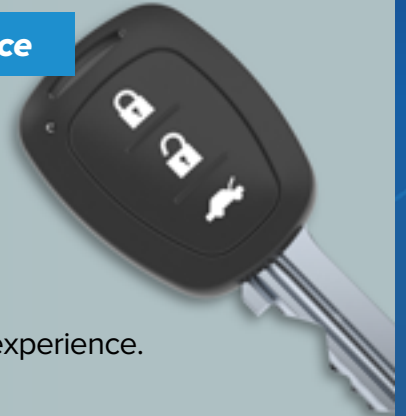

JBS Custom Software Solutions Success Stories

Innovating and Driving Enterprises Forward with Microsoft Technology

Reworked Platform Vastly Improving Sales & Customer Experience

Reworked an existing nationwide media platform to eliminate system downtime, crashes, and random unrecoverable issues for a leading used vehicle enterprise retailer. The robust solution supports the retailer's 24/7 business needs, improving sales conversions, revenue, and the customer experience.

Built and Launched a Franchise Management System

Built a cloud-based system providing a secure, streamlined, centralized administrative management of the operation of **The Goddard School's** across all their franchisees—allowing for real-time visibility into each school and a uniform experience across all locations.

Successful Partnerships
