

A service by Jigsaw24:

MDM Audit

See where you're strong – and lacking

Not sure if your mobile device management environment is fit for purpose? Our MDM Audit service will give you an impartial analysis of your current setup and share recommendations to help you meet the latest standards. It's a handy way to get a clearer picture and ensure one of your key IT disciplines is up to scratch.

The service

An MDM Audit includes reviews of:

- Your MDM configuration and management.
- Your key software and services currently in use.
- Your security policies, benchmarking against industry standards.
- Your security policies.
- Your build process.
- Your Self Service and user experience.

Following these reviews, our mobile device management experts will deliver a summary report of findings and recommendations in a convenient PDF format. Your audit will cover Jamf, Microsoft Intune or Airwatch (other MDM products can also be covered upon request).

The benefits

Having your MDM environment professionally audited makes it far easier to achieve an optimal setup where everything works smoothly. With guidance and best-practice advice from our accredited Apple and Jamf experts, you'll be able to implement the recommendations from our report with confidence and certainty.

The actions suggested in our report will help you deliver a better ROI by maximising your investment in MDM technology, ensure security and compliance, deliver a better user experience, and minimise support cases thanks to an optimised environment.

Why choose us?

Simply put, we're the Apple and Jamf specialists. As well as being the UK's first Apple Authorised Enterprise Reseller, we're also a Jamf Gold Reseller and a Jamf Managed Service Provider with Certified Jumpstart Integrator status, plus a Microsoft Gold Partner. In fact, we've worked with both Apple and Jamf for the best part of 30 years, with over 50,000 devices under our management.

What next?

Let's discuss your MDM Audit. Get in touch with our team and we'll arrange a review of your existing setup.
