

# JioThings Connected Workforce Solution

A comprehensive workforce management solution to boost productivity, reduce expenditures and enhance safety of your field force

---

Organizations that employ a field force for business activities have huge difficulties keeping track of the employees. False claims on field visits leads to impact on sales revenue, customer dissatisfaction as well as excess expenditure due to manipulated reimbursements. The solutions currently available in the market are not compatible with all phones and operating systems. Moreover, due to lack of reliability the apps are prone to tampers.

JioThings Connected Workforce Solution is a standardized, multi-OS friendly app-based solution designed to address all your workforce related needs. Connected Workforce enables businesses to streamline processes related to task planning and tracking, service quality assurance, attendance, reimbursements as well as safety of the workforce

## Who can benefit?

JioThings Connected Workforce solution is ideal for organizations that engage in activities like sales, service security, logistics and any other field force related activities.

With a solution compatible with all makes and models of mobile phones and support for multiple operating systems, workforce management has never been easier! What you get is:

1. Biometric authentication using digital attendance & face recognition
2. Task planner allowing easy assignment and tracking of tasks for managers
3. Beat planning & task management for field force
4. Live tracking & geo-fencing
5. Route management
6. Real time SoS & on-field incident reporting
7. Cell-based tracking in case of feature phones and/or unavailability of internet connection
8. Unified portal & with 3rd party API integration
9. Insights & data Analytics
10. Works with any telecom service provider

---

JioThings Connected Workforce solution helps businesses in the following ways:

1. **Enhanced employee productivity**- Real time tracking & digitized attendance management helps improve employee productivity
  2. **Increased transparency**- Helps in building transparency between the employer and the employee with the help of digital records
  3. **Reduced expenditure on false claims & reimbursements**- 100% reliable & accurate tracking mechanism reduces the chances of false claims and expenditures
  4. **Enhanced employee safety**- Single click SoS alarm intimating emergency contacts regarding the incident with live location, thereby enhancing safety
-
