

Unlocking the Future of Secure Access in Higher Education Environments

This exclusive IAM (Identity and Access Management) strategy and roadmap engagement is designed to elevate the security and efficiency of IAM services for higher education institutions. If you face challenges with on-prem infrastructure, outdated servers, cloud dependencies, or multifaceted MFA services, this engagement delivers tailored solutions to transform your IAM landscape.

Challenges and Areas Addressed:

- On-prem IAM infrastructure and disaster recovery
- Outdated Windows Servers and Active Directory concerns
- Cloud SaaS dependencies to on-prem IAM services (LDAP, Shibboleth)
- Multiple MFA services in use
- ADFS infrastructure security and reliability
- Lifecycle management of faculty, staff, and student accounts

Service Offering Details

JourneyTEAM leads you through our proven three phases:

1. Current State Assessment	2. Envisioning the Future State	3. Roadmap & Milestones of the Project
<ul style="list-style-type: none">• Comprehensive analysis of current IAM landscape• Identification of pain points and challenges• Assessment of Microsoft Licensing, directories, identity providers, MFA services, and more	<ul style="list-style-type: none">• Strategic guidance towards leveraging the Microsoft Entra suite• Creation of a documented logical architecture• Detailed plan of how to solve pain points identified in the current state• Identification of technologies for replacement or reduction	<ul style="list-style-type: none">• Adoption strategy and technical rollout of future state services• Defined milestones for a structured adoption plan• Securing a solid IAM foundation for better alignment with SaaS and Microsoft 365 services• Documented plan for key stakeholders' education and buy-in
