

# Tenant Merger and Acquisition

JOURNEYTEAM

## Unlock Success with JourneyTEAM's M365 Mergers & Acquisitions Expertise

As the pace of business accelerates, so does the complexity of merging or acquiring companies. When merging tenants, organizations are after the following objectives:

- 1. Consolidation:** Consolidate multiple M365 tenants into a single, unified environment. This can reduce administrative overhead and simplify management.
- 2. Single Sign-On (SSO):** To enable users to access resources across both tenants with a single set of credentials, improving user experience and security.
- 3. Data Migration:** Moving user data, such as emails, calendars, and files, from one tenant to another while preserving data integrity.
- 4. Security and Compliance:** Ensure that security policies and compliance requirements are consistently applied across the merged tenant. This includes data protection, access control, and compliance reporting.
- 5. License Optimization:** Optimize licensing to ensure that resources are used efficiently in the merged tenant, avoiding unnecessary costs.
- 6. Domain Consolidation:** Rationalize and consolidate email domains and Microsoft 365 groups to avoid conflicts and streamline email communication.

### JourneyTEAM's Process Includes:

- **Change Management & Staff Training:** We offer training modules and change management frameworks to facilitate smooth transitions and ensure successful user adoption.
- **Future-Proof Solutions:** We offer a roadmap for potential future transformations, ensuring you don't have to "recreate the wheel" for subsequent mergers or acquisitions.
- **Testing and Validation:** Comprehensive testing of the merged environment to ensure all services and applications are working as expected.

### The Outcomes:

- **Cohesive Systems:** Both companies' environments operate cohesively, streamlining operations.
- **Improved User Experience:** Access to consolidated data quickly, promoting more efficient decision-making and collaboration.
- **Holistic View:** A holistic view of its business technology, enabling you to uncover growth opportunities and optimize your technology stack.
