JOURNEYTEAM

Microsoft 365 Tenant Health Check

2-Week Review and Remediation Assessment

»»» Gain Insights. Uncover Risks. Plan for Growth.

JourneyTeam's Microsoft 365 Tenant Health Check provides a comprehensive evaluation of your cloud environment to identify areas of improvement, ensure security and compliance, and prepare your infrastructure for future scalability. This assessment is the first step in optimizing your Microsoft investment and aligning it with your business goals.

Whether it's strengthening security measures, streamlining collaboration tools, or reducing unnecessary licensing costs, our Health Check ensures that your environment is fully optimized to meet your business needs today and tomorrow.

Business Outcomes

Our experts will collaborate with your team to evaluate your current M365 environment and develop a tailored assessment that clearly outlines a strategy driving towards:

- **Reduced Risk:** Identify potential security risks to protect your data and users and to strengthen your security posture and mitigate compliance gaps.
- **Cost Savings**: Optimize licensing and resource allocation to lower operational costs by uncovering underutilized resources and reducing unnecessary licensing costs.
- **Enhanced User Experience:** Ensure tools are configured to improve collaboration and productivity and streamlined for use with collaboration tools (Teams, SharePoint, OneDrive) for better performance and user experience.
- **Futureproofing:** Align your tenant with industry best practices to support long-term business growth and set up for seamless, efficient work.

Engagement Deliverables

You'll benefit from JourneyTeam's in-depth Azure and Microsoft expertise and our proven ability to provide prescriptive, prioritized recommendations that will ensure the viability and cost-effectiveness of your tenant. Here's what you'll receive:

- **Comprehensive Health Report:** Detailed findings across security, performance, and cost.
- **Actionable Recommendations:** Prioritized roadmap to address issues that can be remediated immediately and those that require future work to optimize the tenant.
- **Tenant Health Score:** A high-level metric of your tenant's security posture, with recommended improvements and guidance for tracking progress.

JourneyTeam has achieved the performance, technical skilling, and customer success requirements required across the Microsoft platform, showcasing our ability to support customers' digital transformation initiatives. As a Microsoft Solutions Partner for Azure, Modern Work and Security, you can rest assured you'll have a partner who can deliver the solutions that lead to your success. **Contact Us today!**
