

## Zero Trust Security Assessment

10-Hour Evaluation and Roadmap

» JourneyTeam's Zero Trust Security Assessment is designed to provide a clear, actionable strategy for strengthening your organization's Microsoft 365 security posture. Tailored for businesses navigating modern cyber threats, our workshop empowers IT and security leaders to adopt a Zero Trust architecture using the full capabilities of Microsoft tools like Microsoft Entra ID, Microsoft Defender, and Microsoft Sentinel.

We'll help you assess your current environment, identify vulnerabilities, and implement a step-by-step roadmap to secure identities, devices, data, and applications—ensuring only trusted users and devices have access to your critical resources.

### Business Outcomes

Our experts will collaborate with your team in workshops to assess your current systems, business needs, and develop a tailored roadmap that clearly outlines a Zero Trust strategy driving towards:

- **Strengthened identity and access management** through the enforcement of least-privilege principles and multi-factor authentication (MFA) across all users and devices.
- **Enhanced data protection** by ensuring secure access to sensitive information and applications, with real-time monitoring and adaptive security controls.
- **Comprehensive threat detection and response** by integrating advanced analytics and automated security operations to quickly identify and mitigate risks.
- **Improved compliance and governance** with consistent enforcement of policies and regular audits to meet industry standards and regulatory requirements.
- **Scalable and resilient security architecture** that adapts to your evolving needs, supporting hybrid, multi-cloud, and remote work environments securely.

### Engagement Deliverables

Partner with us to gain the insights, analysis, and recommendations you need to seamlessly implement a Zero Trust architecture. Here's what you'll receive:

- **Tailored Strategy Sessions:** 10 hours of in-depth evaluations focused on your organization's unique security posture, aligned with the 6 core pillars of Zero Trust. Our business-driven approach ensures solutions are not only secure but also practical for your operational goals.
- **Prioritized Improvement Scenarios:** A clear, prioritized list of potential enhancements to your security framework, designed to address vulnerabilities and optimize your defenses for the most impactful results.
- **Actionable Roadmap to Success:** A step-by-step plan for ongoing improvement initiatives, ensuring your security measures evolve to stay ahead of threats.

JourneyTeam has broad and deep expertise to help safeguard your organization with integrated security, compliance, and identity solutions. As a Microsoft Solutions Partner for Security, you can rest assured you'll have a partner who has the commitment to training and accreditation and has delivered solutions that lead to customer success.
