Journyx for Microsoft Dynamics ERP

Track time in one system. Use the data in Dynamics GP, NAV, SL, or 365.

Journyx enterprise time and expense tracking software integrates with Microsoft Dynamics GP, AX/365, NAV/Business Central and SL. Journyx for Microsoft Dynamics allows companies to quickly implement a complete time and expense tracking solution using existing business data.

Track time one time in one system. Use the data anywhere.

With Journyx time tracking integrated with Microsoft Dynamics, you'll empower your organization with powerful time and expense tracking, make your job easier with the tools you need to manage, process and report on employee time and expenses, and drive growth at every level.
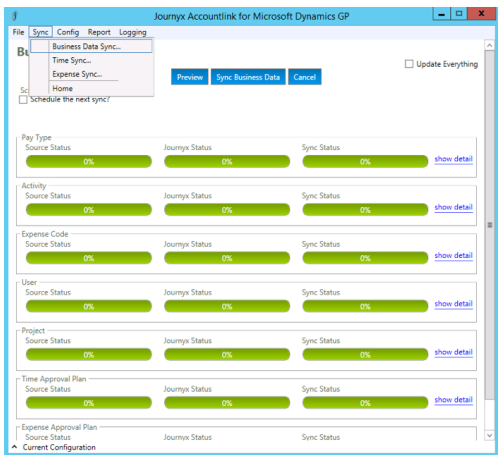

The key to gathering rich, accurate time data for payroll, billing, projects, and/or resource management is to make it as easy as possible for people to get their time entered in the first place. Journyx makes it easy for people to track all of their time in one place – around the globe and on any device.

Journyx features flexible accrual calculations, multi-level approvals, mobile entry, integration with Microsoft Project, powerful reporting both natively and in Excel and Power BI, AI-driven time entry from other applications, data validation, and more.

Journyx Accountlink pulls data directly from Dynamics for a quick and easy Journyx set-up.

Easily set up Journyx time entry so each employee has access to the correct projects, cost categories and pay codes.

Journyx provides dynamic, visual reporting dashboards that allow you to keep track of your real-time labor and project costs.
