

How will you
improve wellbeing
for the hybrid workplace?

2022:
it's time for
mental fitness!

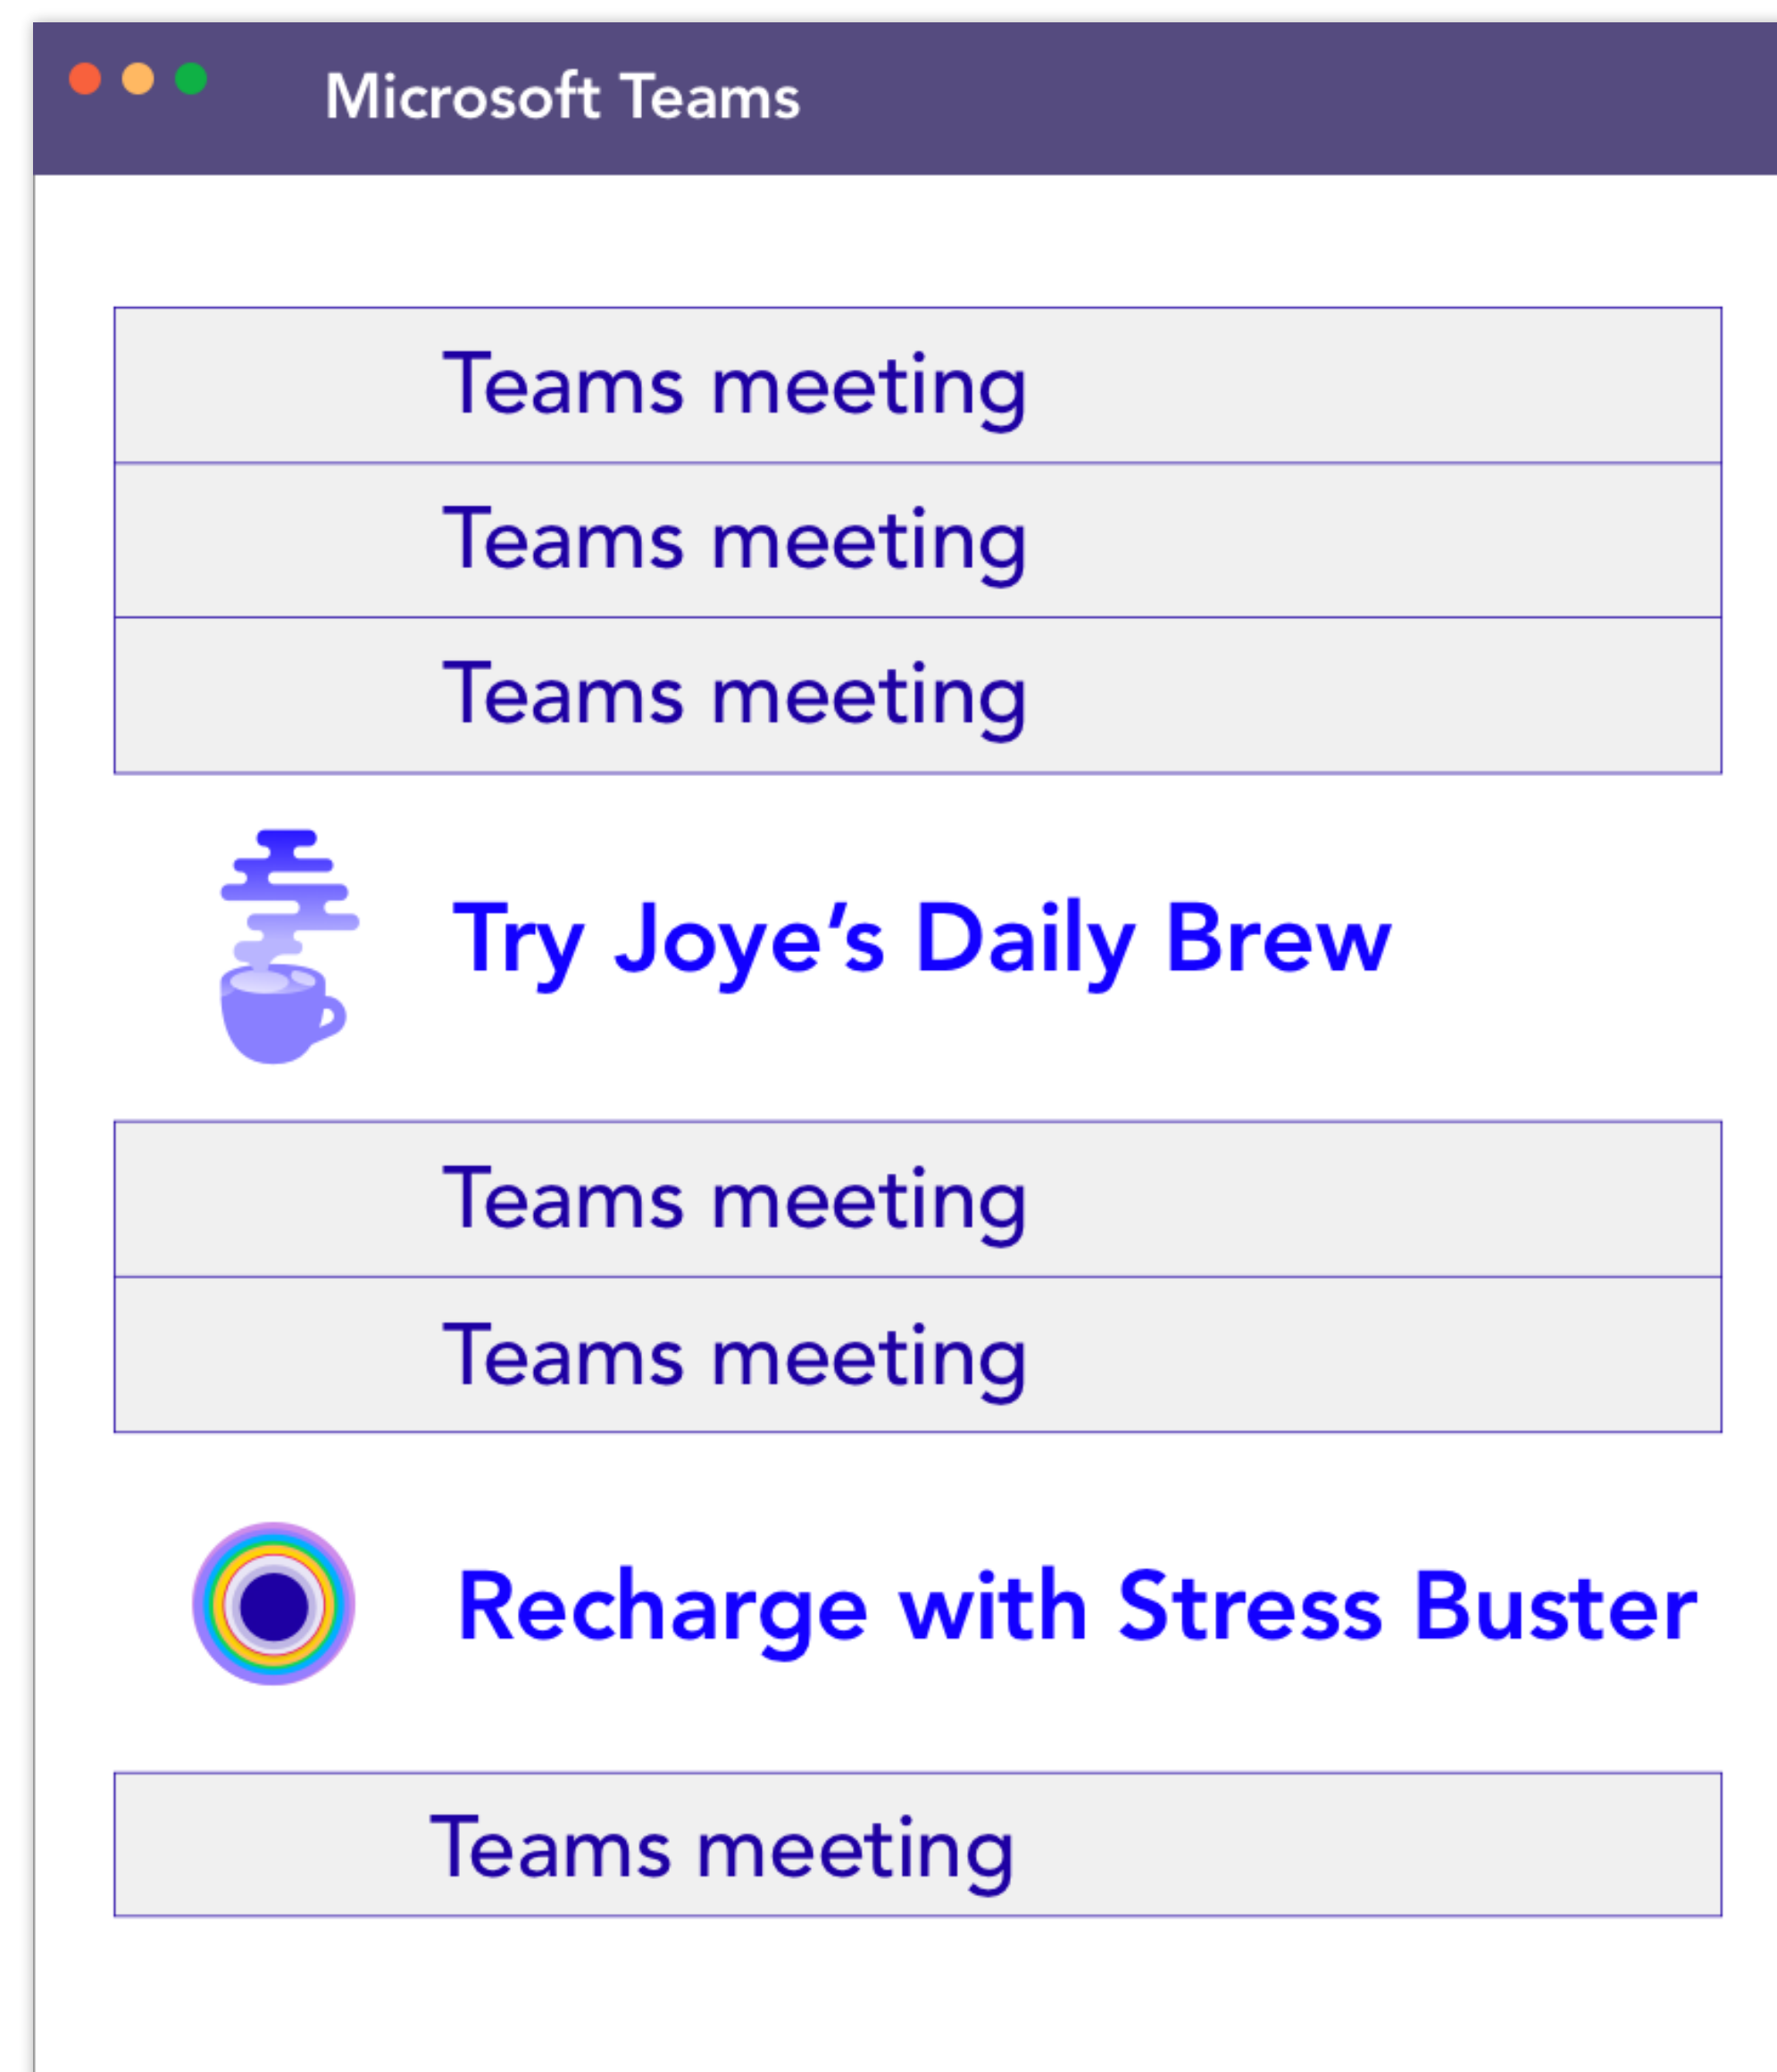

Prevent burnout and improve productivity with **Joye for Microsoft Teams**

In the matters of the mind, it is the timing that matters the most. A good suggestion when you are down and confused is more powerful than the thousand mental wellbeing apps in your phone.

Make mental fitness a habit

Joye analyses your work pattern in Teams with extreme privacy and prompts you at the right time to recharge and boost your productivity again. You can measure your daily joy-level, and manage your wellbeing with Joye's Daily Brew or the Stress Busters!

Dashboard of
daily joy-level of
your organisation

Right care
Right place
Right time

Improve
wellbeing

Measure wellbeing, while you improve it

While employees improve their mental wellbeing, we consolidate the joy-level of all users to present an anonymous dashboard of daily emotional health of your workplace. Joye Insights complements Viva Insights!

Activate with one click - it's easy! You can deploy Joye for all employees with full control of your security and privacy policies. Your Teams Admin controls SSO-access and privacy-permissions. www.Joye.ai/deploy
