INTRODUCTION

It was during the relocation of a Data Center that the idea of K inventory was born. At that time, our company found itself confronted with a problem of traceability of computer equipment.

After 7 years of research and development, the K inventory software suite was deployed to major clients such as Société Générale and BNP Paribas.

Our vision being to support our clients' sustainable performance, we naturally developed our solution for SMEs, mid-sized companies and public organizations on an online version accessible through our website k-inventory.com.

OBJECTIVE

We support companies to improve their sustainability performance.

K inventory aims to **simplify** the inventory and management of equipment, **improve the traceability** of goods and fight against the waste of material resources.

MARKET

We support all sectors of activity from the private to public sector.

The **customizable** solution makes it possible to **follow the lifecycle** of all types of equipment: including IT equipment, furniture, works of art, tools, medical equipment and PPE.

TECHNOLOGIES

Thanks to **contactless technologies** (barcode, QR code, RFID) and IoT, traceability is optimized.

From your smartphone, you can: scan, manage inputs and outputs as well as view inventory levels wherever you are.

STRENGTHS

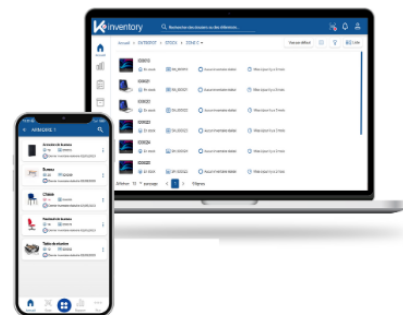

- ✓ Flexible and fast deployment
- ✓ Real time data from the field using the app (Android & iOS)
- ✓ Customizable dashboard
- ✓ Single platform for multi-site management

BENEFITS

- ✓ Saving time in material management
- ✓ Elimination entry errors through scanning
- ✓ Reducing equipment losses
- ✓ Optimization of equipment purchases

MORE FEATURES

- Skill transfers
- Interfacing with other software / API
- Mass data transfer
- Data exports

CLIENTS' FEEDBACK

Ludovic - Deputy data center manager

For our structure, the contribution of K inventory can be translated by the word: "**Flexibility**", flexibility of adaptation of the solution to our specificities, flexibility of exploitation and sharing of data.

BP2i (BNP paribas Group)

Kamel - Assistant manager of local services

Thanks to K inventory we **manage our consumption flows** and **follow the entire life cycle of the equipment**. While having the capacity to **produce reporting**, consume it and distribute it, we are now able to **manage our daily expenses**.

SOCIETE GENERALE

Yoni - Data center inventory manager

Since the implementation of K inventory to our warehouse, we have **gained in efficiency** and optimized the traceability of our equipment as well as the **speed of execution** of our daily operations.

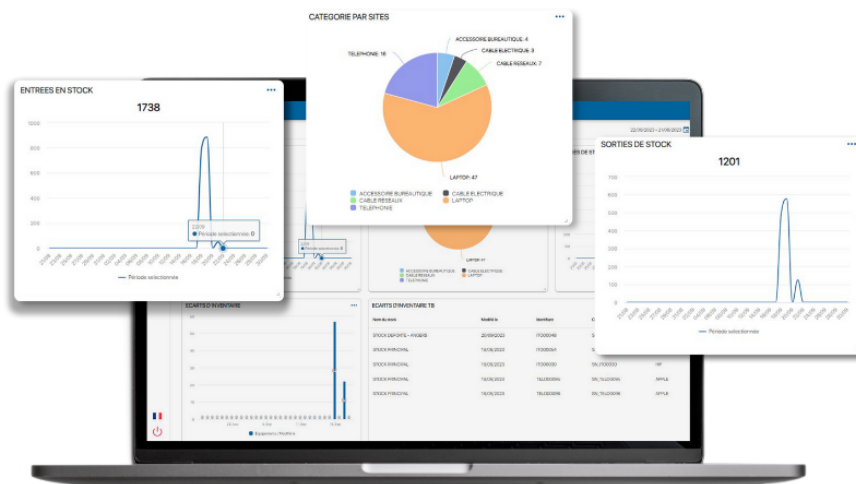

ITEMS

Christophe - Application domain manager

K inventory meets the **challenges of equipment traceability**. This tool is **simple, modular** and capable of reporting.
