

GET TO KNOW OUR NEW SERVICE!

# DICOM2HOLOLIVE

## INTEGRATED PLANNING SYSTEM

### Our Service

3dific and Kabel join forces to revolutionize the healthcare sector through Mixed Reality. Thanks to this new service offered together, healthcare providers will be able to have at their disposal the DICOM images of their patients transformed into 3D models, which they can easily view with Microsoft's HoloLens device.

With Dicom2Hololive, the professional's communication with other members of the medical team will be amplified. Hygiene and safety measures will be maintained because it would not be necessary to touch any surface or real object and, in addition, it will be possible to obtain more information on the patient's pathologies existing in their organs.

Take another step towards digitization with us!

# DICOM 2HOLOLIVE

## HoloLens 2

Thanks to this Microsoft device with a wide field of vision, see multiples holograms at the same time and interact with them in a natural way, only needing the use of your voice and the gestures of your hands

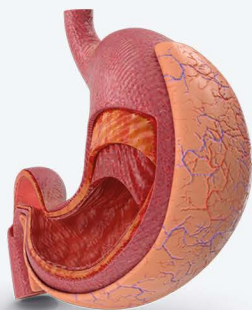

## No- touch

To interact in the APP we only need to use the voice and the gestures of the hands, so the HoloLens bearer can avoid touching any surface thus guaranteeing hygiene and safety measures in a sterilized room

## Collaboration

Doctor will be able to prepare and carry out their surgical procedures while being connected with other healthcare professionals remotely. Improving the intervention by collaborating with other experts

## Accurate Segmentation

Thanks to Mixed Reality it is possible to represent patient's organs in the space, to explore existing pathologies and analyzed them in a precise way thanks to DICOM2Hololive
