DATA & AI DELIVERY

ADVANCED DATA SOLUTIONS

Kagool is a leading provider of advanced Data & AI solutions on Microsoft Azure. We work closely with our clients to understand their unique business needs and develop customized strategies for implementing data solutions that will drive business value. Our end-to-end services cover everything from data integration to advanced analytics and visualization, leveraging the power of machine learning and AI technologies.

WHY WORK WITH US?

- ✓ Expertise in data integration, ETL processes, and data governance.
- ✓ Optimization of data processing, analysis, and visualization.
- ✓ Leveraging machine learning algorithms and AI technologies.
- ✓ Customized data solutions to meet specific business needs.

End-To-End Solution Offering

Ingestion

Unlock your ERP data
with our **PaaS solution, Velocity**

CHANGE DATA CAPTURE

Velocity offers seamless CDC integration for ERP and non-ERP extractions (out of the box), simplifying data ingestion and enabling near real-time insights, all while reducing risk and complexity.

SUPPORT ANY TYPE OF OBJECT

Velocity operates in the application layer, extending extraction capabilities to cover a wide range of object types, including BW extractors, T-codes, queries, reports, and other custom objects from ERP systems.
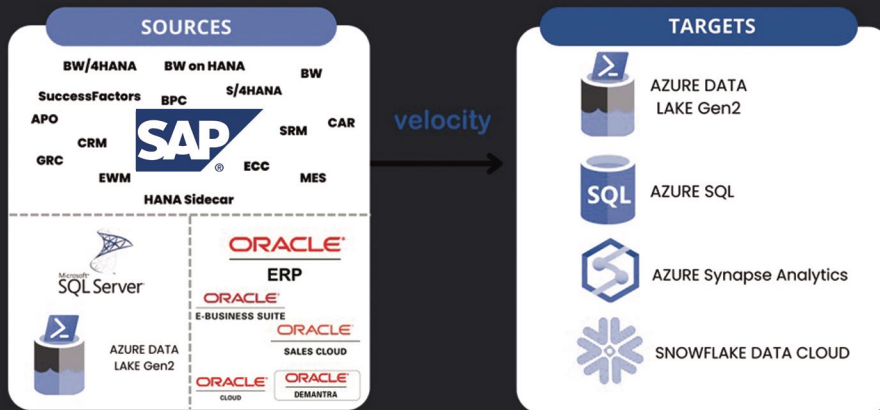

LOW/NO IMPACT ON SOURCE

Velocity minimizes the impact on the source system and avoids disruption to business operations, ensuring high availability and no downtime of your source during Business As Usual (BAU) operations.

Velocity – Overview
### Sources & Targets Supported

DATA WAREHOUSE

Standardize your single point of truth with our ERP-based Common Data Models (CDMs)

INDUSTRY SPECIFIC DATA MODELS

SAP/Oracle-based Industry specific models to accelerate your timelines towards Intelligent Data Platform (IDP).

Data Governance

Enable your organization to make informed decisions with confidence and run business without any disruption.

MASTER DATA MANAGEMENT

Embed reusable master data management tooling into your organization that can be configured to suit organizational needs and help realize your data strategy.

DATA QUALITY

Certify seamlessly the quality of your data with our PaaS solution - Pulse.

Analyse
Monitor
Observe

DATA OBSERVABILITY

Provides real-time insights, ensuring data continuity and reducing downtime. With continuous monitoring, organizations can detect anomalies and troubleshoot issues quickly, improving operational efficiency.

DATA TRACEABILITY

Data traceability is essential for data observability. By tracking data lineage and flows, organizations can quickly detect and resolve issues, ensuring timely resolution and reducing the risk of data errors.

DATA ANALYTICS

Empower business to create their own reports with self-service capabilities and our **ready-made Power BI reports** for **all Line of Businesses (LOBs)**

INSTANT INSIGHTS

Revolutionize your business Insights with our ready-made self-service dashboards, tailored for each of your business units.
