KAISPECare

KAISPE

Effectively manage every aspect of Patient & Clinic Operations, from appointment booking to billing, all within a single unified platform

Licensing:	Software as a Service (SaaS)
Categories:	Healthcare Management, Clinic Operations, Patient Portals
Industries We Serve:	Hospitals, Multi-Specialty Clinics, Telemedicine, Private Practices
Target Market	Small to Mid Size Clinics

Key Capabilities

Patient & Family Management
Comprehensive patient registration, consent management, and complete medical history including vitals, procedures, diagnoses, allergies, and medications

Smart Appointment Booking
Seamless slot-based scheduling across multi-clinic locations and multiple providers, reducing wait times and optimizing clinic flow

Clinical & Provider Management
Manage care teams, provider schedules, and utilize customizable configuration checklists for recording patient vitals efficiently

Advanced Billing & Invoicing
Integrated CPT-based billing, comprehensive insurance management, and automated invoicing workflows for patients and providers

Dedicated Portals & Feedback
Tailored experiences with Patient Portal, Doctor Portal, and Backoffice Application, with integrated feedback management

Key Usage

Streamline clinic operations for efficient patient care. Optimize provider schedules, track vitals, and ensure a seamless healthcare journey

Optimize patient portals for better engagement. Streamline appointment booking track medical history and enhance collaboration

Refine back-office workflows for streamlined billing efficient insurance management, and collaborative care team coordination

Quick Facts

Overview

Manage all your clinic interactions and patient workflows in one place, from initial booking to daily clinical activities

Improve care coordination, organize tasks efficiently, and handle everything from medical records to CPT billing with clarity and control

Industry Pain Points

Fragmented Patient Records
Scattered records and manual tracking slow diagnosis and care

Scheduling Conflicts
Unclear provider availability delays appointments across multiple clinic locations

Complex Billing
Manual CPT coding and claims delay payments and increase overhead

Disconnected Systems
Lack of unified portals creates friction between patients, doctors, and back-office staff

Integration

KAISPECare connects seamlessly with enterprise systems, including Microsoft Dynamics 365, Business Central, major EHR/EMR systems, and other healthcare ERPs

Why Choose Us?

- Built on Microsoft Power Apps and Power Pages for enterprise-grade security and scalability
- Regular updates and healthcare compliance enhancements
- Flexible pricing plans with customizable Add-ons

Let's Build Stronger Healthcare Relationship Together!
