ABOUT COMPANY

Kalkisoft, a prominent software development company based in Pune, specializes in delivering top-notch, customized software development services and product development solutions. Our team is dedicated to designing, developing, and implementing cloud-based applications and mobile applications that seamlessly automate and streamline your business operations.

We take pride in our diverse range of software development products, including but not limited to Estimation & Costing Software, Billing Software, Accounting Software, Donation Management Software, Office Automation Software, E-commerce Solutions, and UX/UI design services. Each of these products is crafted with meticulous attention to detail, ensuring they meet your unique requirements and industry standards.

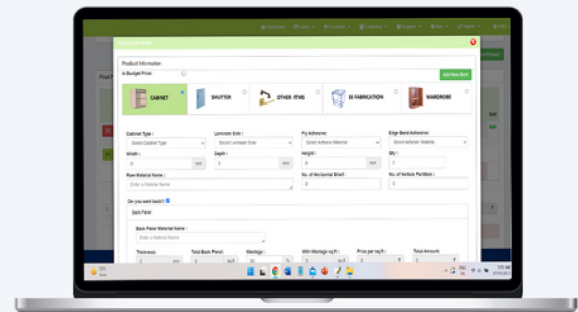

PRODUCT REVIEW

QulnPro is a specialized software exclusively designed for kitchen manufacturing industries. With its comprehensive features, it facilitates effortless generation of quotations, bills of materials, and production slips, streamlining the entire production workflow.

Quotations Management:

you have the power to customize your quotes based on specific product dimensions and specifications. This level of customization ensures that each quote is tailored precisely to meet the unique requirements of your customers, enhancing the accuracy and relevance of the pricing and product information provided.

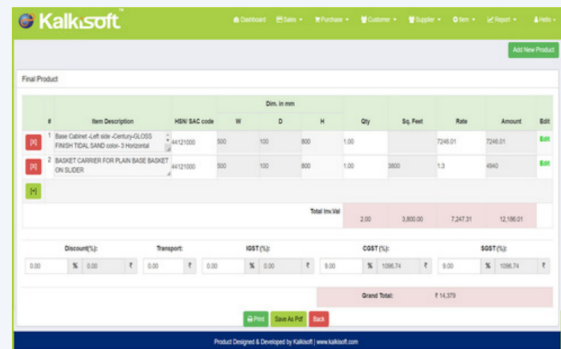

ID	Item Name	Lamination Type	Item Type	Thickness	Qty	Total Sq Ft	Weight Kg/Sheet	Purchase Price	Remarks
1	POST LAM PLYWOOD		PLYWOOD	16.00	16.00	25.62	200.00

10	WHITE	PLAIN WHITE	EDGE BAND	0.00	10.74	10.20	0.00		
11	PLAIN WHITE	GRANITE-PLAIN WHITE	LAMINATION	0.00	41.00	40.94	0.00		

Bill of Material:

Bill of Material functionality is a powerful tool that enables businesses to accurately calculate production costs. The system provides detailed insights into material costs and consumption, allowing for precise tracking and analysis of expenses associated with production.

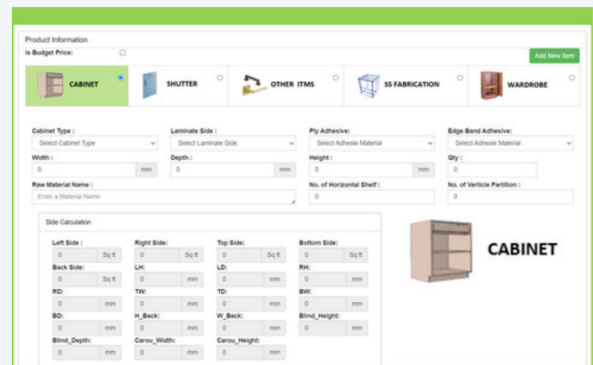

Quotations Management:

With the Quotations Management system, you have the freedom to customize your quotes based on specific product dimensions and specifications. This level of customization ensures that each quote is tailored to meet the unique needs of your customers, enhancing the accuracy and relevance of the pricing and product information provided.

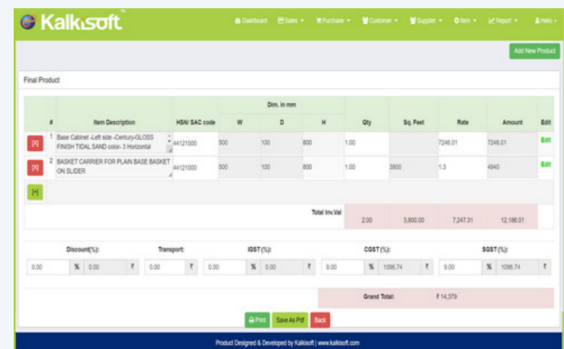

Product Configurator:

QuinPro, is a highly advanced tool designed to streamline the production process. With its powerful capabilities, QuinPro automates the generation of production slips, ensuring that all the relevant details are included. These production slips contain essential information such as the type of materials needed and the cutting sizes required for manufacturing or assembling the customer-specific customized products accurately.

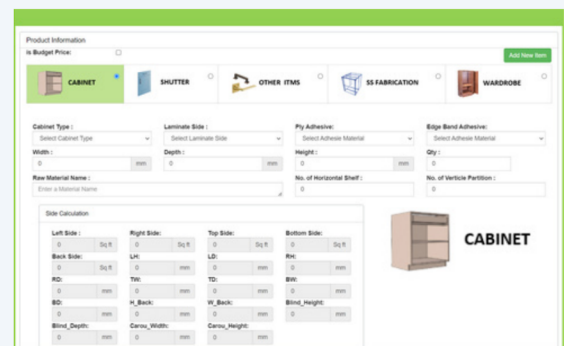

Sales Order:

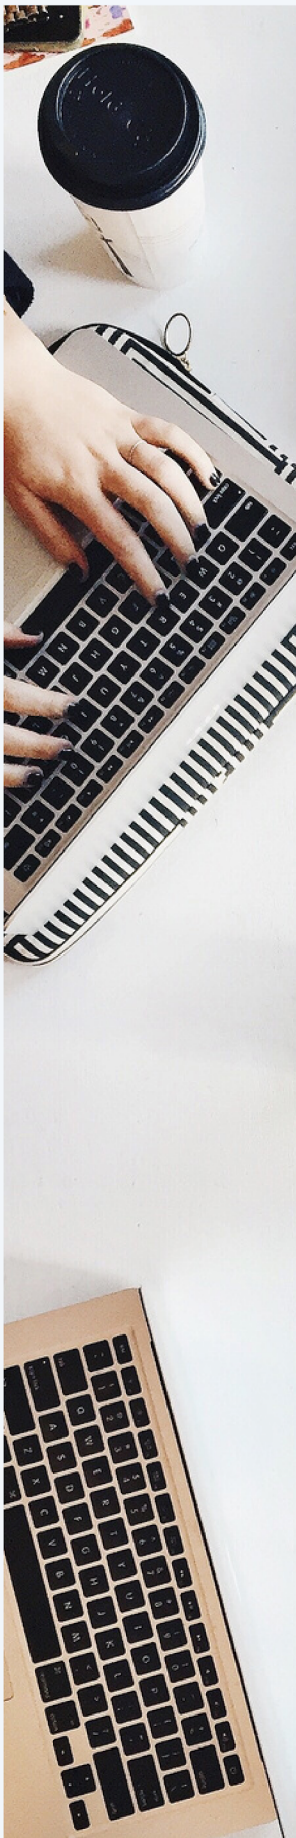

Enhances customer service through fast, efficient order processing and accurate, timely order fulfilment while maximizing sales through instant access to information on stock availability, prices and product substitutions.

Inventory Management:

Enables you to optimize stock levels and to provide inventory, maintaining optimal stock holdings. System also notifies low level of material. Our Inventory solution further enables you to generate purchase order from inventory list automatic or manual.

PRODUCT FEATUER

- Intuitive and user-friendly interface for easy navigation and operation.
- Streamlined quotation generation for various products like cabinets, drawers, wardrobes, shutters, MS/SS frames, hardware items, etc., eliminating the need for manual calculations.
- Efficient and rapid estimation of costs with QulnPro's advanced calculation capabilities.
- Seamless conversion of quotations into invoices with just a single click, saving time and reducing administrative tasks.
- Quick generation of reports, including sales, GST, purchase, stock, and delivery challan reports, providing valuable insights for decision-making.
- Material consumption report functionality to effectively manage and track stock levels.
- Automatic notifications for low material stock items, enabling timely procurement and preventing production delays.
- Accurate generation of production slips with cutting sizes for each panel, ensuring precise manufacturing and assembly.
- Convenient generation of identification stickers for ready panel sheets, simplifying the organization and identification of materials.

PRODUCT BENEFITS

- Effortlessly create professional quotations with our user-friendly software, simplifying the quotation process.
- Benefit from our automated system that calculates the square footage area of cabinet panels, panel cutting requirements, and wastage, ensuring accurate measurements and efficient material utilization.
- Save valuable time and resources by utilizing our software to calculate precise panel cutting sizes for production, reducing errors and optimizing material usage.
- Rely on our software's error-free estimation capabilities, providing you with accurate cost projections for your quotations.
- Enjoy the ease of operation with our software, designed to be user-friendly and accessible without requiring any specialized skills or training.
- Access your data and work on the go with our cloud-based application, allowing you to manage quotations from anywhere, enhancing flexibility and convenience.
- Stay updated on the status of your orders with our software, enabling you to track progress and provide timely updates to your customers.
- Optimize material usage and minimize wastage by utilizing our software's features, ensuring efficient sheet optimization and reducing unnecessary costs associated with material wastage.
