LEARN
UNLOCK
YOUR
POTENTIAL

Transforming learning and development in your organisation

Kallidus Learn is a **cost effective**, scalable SaaS solution that enables you to deliver **personalised** learning to any size of workforce, in multiple locations and languages.

With Learn in place, you can **quickly reduce costs** and eliminate business disruptions associated with traditional learning, **improving efficiency and performance.**

With every learner interaction tracked and measured, you **rapidly gain** rich insights and combined with intelligent reporting, you can **make better business decisions**, optimise learning plans and clearly demonstrate return on investment for **long term business success.**

1 Are you dissatisfied with **compliance and engagement** levels?

2 Is limited access to learning **restricting** employee development?

3 Are you dissatisfied with an existing LMS that isn't **improving engagement**, hasn't driven the efficiencies expected or doesn't **create the reports you need**?

4 Are you **frustrated** by **traditional** paper-based systems and classroom training that is **inefficient and difficult to measure**?

5 Are **spiralling training costs** limiting your organisational development?

6 Can you demonstrate the **true impact** learning is delivering and prove **return on learning investment**?

Are your existing systems limiting learning potential?

Kallidus Learn: mobile-friendly for the modern learner.

Setting a new standard for learning

Learn streamlines the **delivery and management** of e-learning, classroom training, learner achievement and administration. With all learning material in one place, you will **rapidly improve** accessibility and efficiency, **reducing costs** across your entire organisation.

Through our ground breaking **new interface**, learners can access learning faster than ever before, on a range of devices, at a time and a place that suits them.

Learn immerses employees in a **rich experience** that encourages them to look beyond their essential training to drive greater development.

Intuitive dashboards give managers **complete clarity** over individual and team progress, **quickly identifying** knowledge gaps and opportunities.

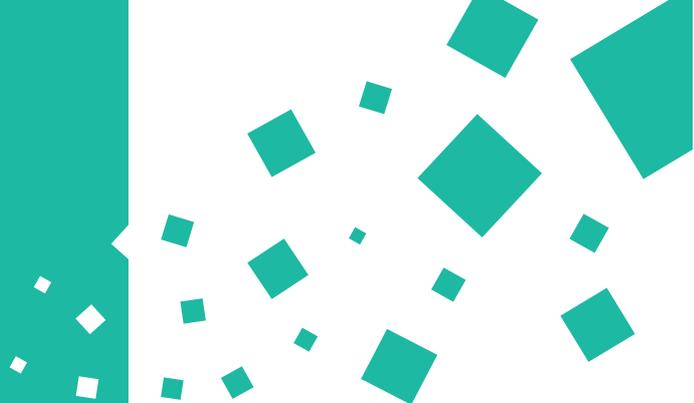

Automation **ensures** managers can focus on **supporting development** and save time by not having to chase completions or aggregate data.

Powerful analytics and flexible reporting ensure it's easy to demonstrate compliance rates, make informed decisions to **improve learning outcomes**, prove return on learning investment and much more.

Swipe. Tap. Zoom.

Give your users the modern experience they expect

Exceptional implementation, service & support

Unlike many other software providers, we don't just want to sell you a license. When you work with Kallidus, you **gain access** to 15 years of expert industry knowledge, a **multi-award winning** content development team and **exceptional customer service**.

Combined with hands on **support**, proven **project management methodology** and exacting **attention to detail**, we

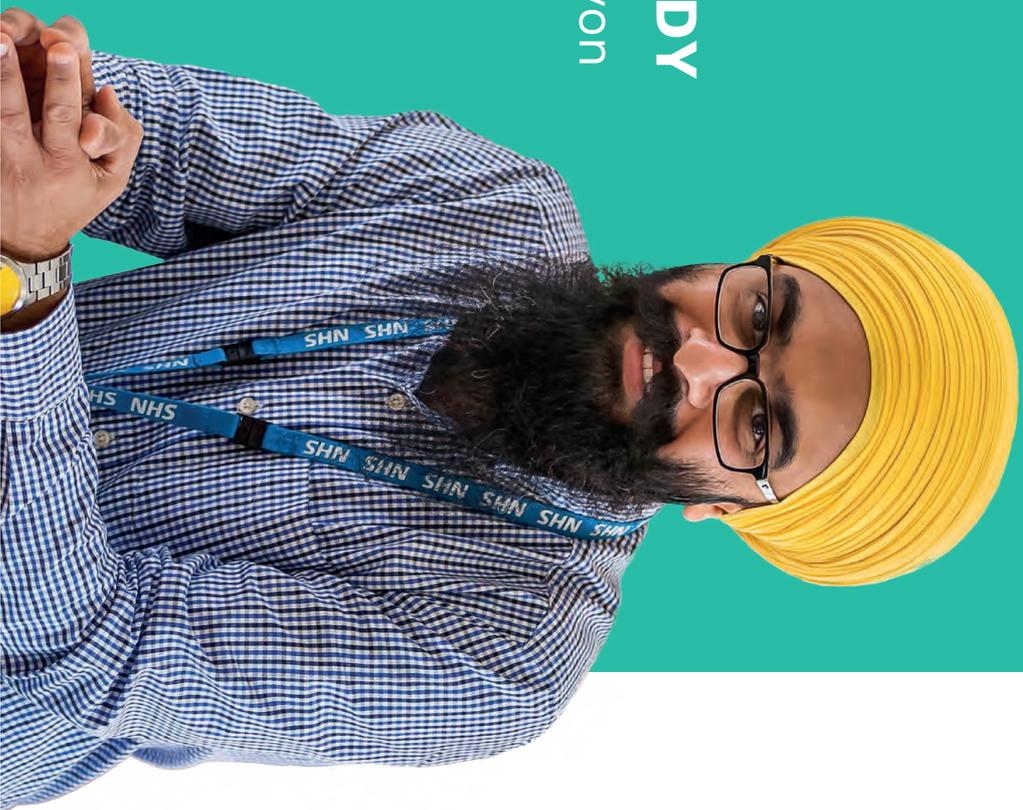

consistently deliver **exceptional solutions** to the highest standards.

The first step to **working together** is a short, exploratory conversation to **understand your learning and development objectives**. We'll then schedule a demonstration to show you exactly how Learn will **overcome your challenges** and **achieve your goals**.

CASE STUDY

Northern Devon Healthcare NHS Trust (NDHT)

The Challenge

The Trust had access to an NHS-funded National Learning Management System but found the **quality, usability and accuracy** of the system was hindering rather than **improving learning outcomes**, which had left staff disengaged and wary of online learning mechanisms. NDHT relied heavily on face-to-face learning instead, yet training venue costs, travel and time

away from work – both in and out of hours – **significantly impacted clinical effectiveness, patient care and efficiency measures**. The Trust needed a user-friendly system to **manage** and access the complete learning prospectus and, with existing relationships with a number of Trusts, **Kallidus was the ideal partner for the project**.

RESULTS

- 1 £1m saving in training costs.
- 2 Compliance levels exceeded targets with an 86% average (previously between 60-65%) - with some compliance levels improving by over 25%.
- 3 The increase in e-learning saved 4,264 hours of clinical and nursing time and 3,990 hours of non-patient facing time: a total of almost 8,300 hours.
- 4 25% increase in use of e-learning.
- 5 CPD courses were available three months ahead of target.

KEY FEATURES

- 1 **Learner dashboard**
Give learners a friction-free experience and allow them to access essential training in less than two clicks.
- 2 **Manager dashboard**
Allow managers to easily track their teams learning, scheduled classroom learning and credit top learners.
- 3 **Track and Remind**
See who hasn't completed training and send personalised reminders.
- 4 **Search and Filter**
Learners can filter by course, category and duration to quickly find the learning they need.
- 5 **Personalised learning**
Achievements and course content are personalised to each user for a more relevant learning experience.
- 6 **Course cards**
Every course has its own course card. Learners can see course duration, their score, and their progress – helping them to stay on track.
- 7 **Apply your own brand**
Rebrand the system in just a few clicks. No coding required.
