Automating Azure to Fabric Migration

| Azure Data Factory | → | Fabric Data Factory |

Azure Data Factory

Azure Synapse

Fabric Data Factory

Migrating from Azure Data Factory and Synapse Gen2 pipeline to Fabric Data Factory can be complex, time-consuming, and error prone. Kanerika's Migration Accelerator makes the transition seamless, fast, and reliable.

Why Migrate from Azure to Fabric?

Unified Platform
All analytics tools in one integrated experience.

Better Performance
Auto-scaling with distributed architecture for peak loads.

Built-in CI/CD
Native deployment pipelines without external Git setup.

Cost Optimization
OneLake eliminates duplicate storage and data transfer

Challenges with Manual Migration

Pipeline Reconstruction
Recreating hundreds of pipelines takes months of coding.

Testing Overhead
Extended validation cycles extend production deployment

Configuration Errors
Manual setup creates broken connections and lost business logic

Cost Optimization
Teams struggle with Power Query syntax and Fabric architecture.

83%
Data migrations fail or exceed budgets

70%
Effort spent in planning & assessment

6-24 months
Avg manual migration time

Azure to Fabric Migration with Our Accelerator

Automated Discovery
Our Accelerator maps pipelines and dependencies in your Azure.

One-Click Conversion
Transforms Azure JSON to Fabric format while preserving logic.

API Deployment
Deploys converted pipelines to Fabric workspaces instantly.

Dataflow Migration
Automatically selects PySpark or Power Query for performance.

Why Choose Kanerika's Migration Accelerator

Time Savings
Cut migration timelines from months to days.

Zero Business Downtime
Switch over without disrupting operations.

No Extra Resources Needed
Automated migration without additional staffing.

Accuracy Guaranteed
Preserve all pipeline logic and dependencies.

Don't let manual migration slow you down. Switch from **Azure to Fabric effortlessly with Kanerika**
